Roath Park

An Escape from a City Life

- **A victorian park opened in 1894 at the heart of Welsh capital Cardiff is an escape from a busy city life. The park covers around 130 acres of land and 30 acres of man-made lake including a 5km circular trail for running and walking across the lake to support all level of fitness. The park contains diverse habitat of plants, trees, flowers, birds and animals. The park contains Green Flag Award an international mark of quality and registered with Cadw Register of Landscapes, Parks and Gardens of Special Historic Interest in Wales.**

Flowers

The Park is filled with a wide variety of beautiful shrubs bringing colours of joy for the visitors.

Shrubs of different colours, shapes and textures

Trees

Interestingly the benches
available to sit were donated
by the residents in the
memory of their loved ones

A beautiful stream of water with walking pathway.

Botanical Gardens

**A diverse variety of Beautiful flowering shrubs
next to the conservatory area.**

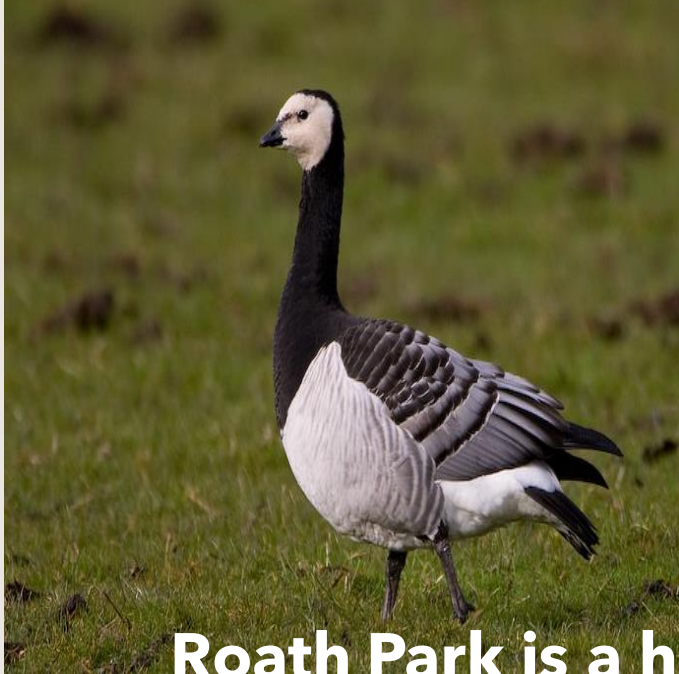

Monument

On left is a monument when Terra Nova went for an expedition to Antarctica. On right there is a Scott Light House and a café behind it.

Terra Nova sailed from Cardiff on 15th June 1910 heading for the South Pole via S. Africa, Australia and N. Having spent 20 days batted in the Southern ice Scott and his party finally arrived off Ross Island on

Roath Park is a home to a wide variety of birds including Mute Swan, Great Crested Grebe, Black headed gull, Eurasian Coot, Mallard etc. There are four islands within the lake which are not accessible to the public and safe for nesting.

The children play area is very well developed caters the children below the 14. It has gated boundary wall that allows both parents and children to have a peace of mind.

The park is equipped with information board that allows the visitors to be aware of the facilities and attractions available.

LAKE

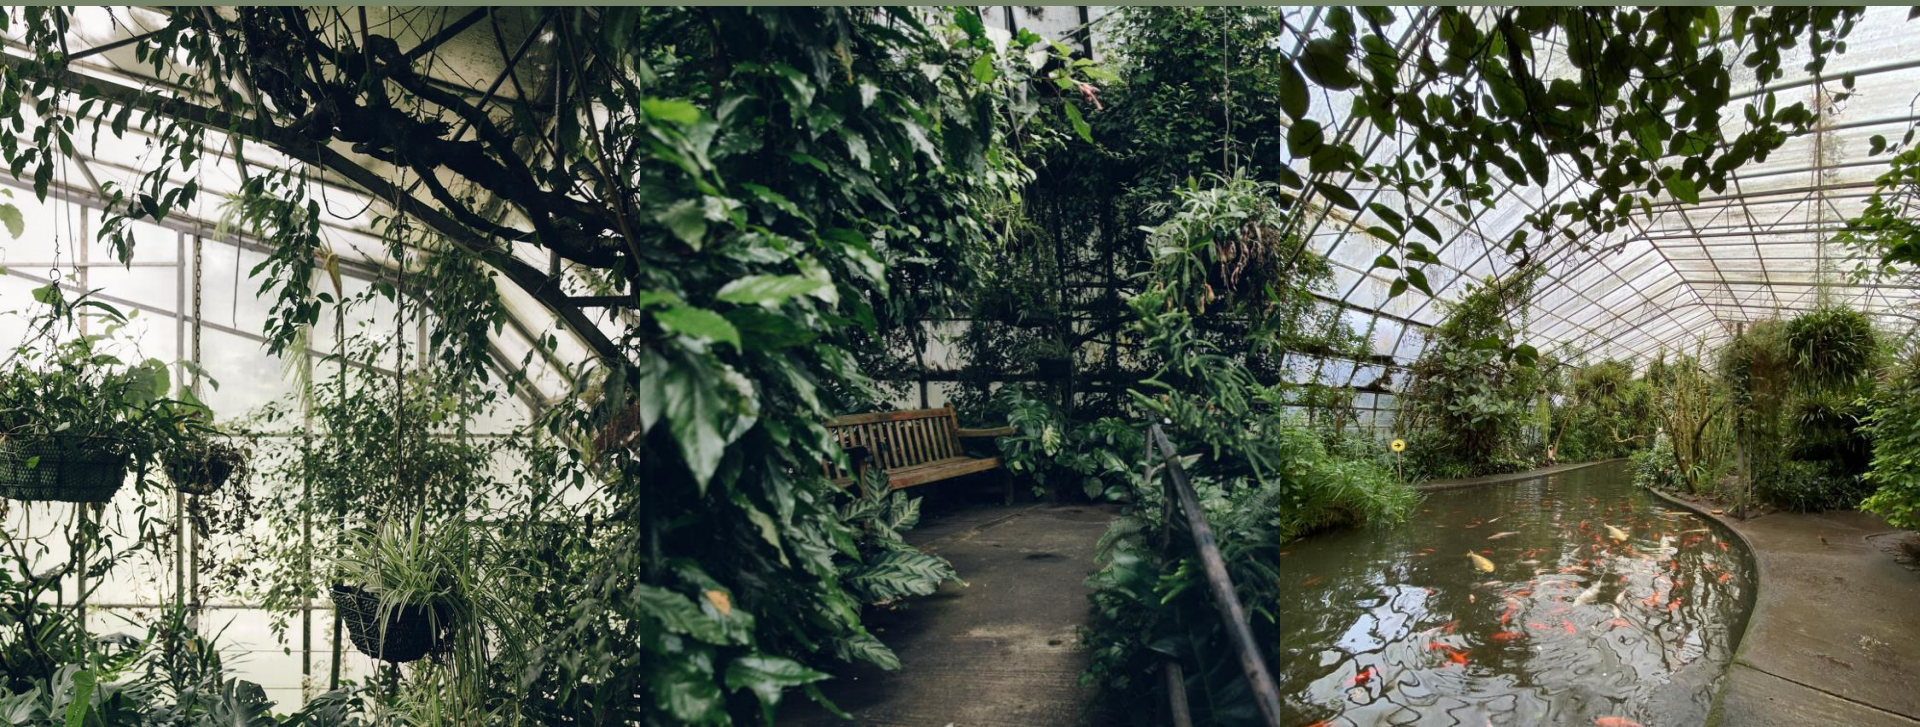

The park is equipped with bins with a clear warning signs of 80£ if caught throwing litter.

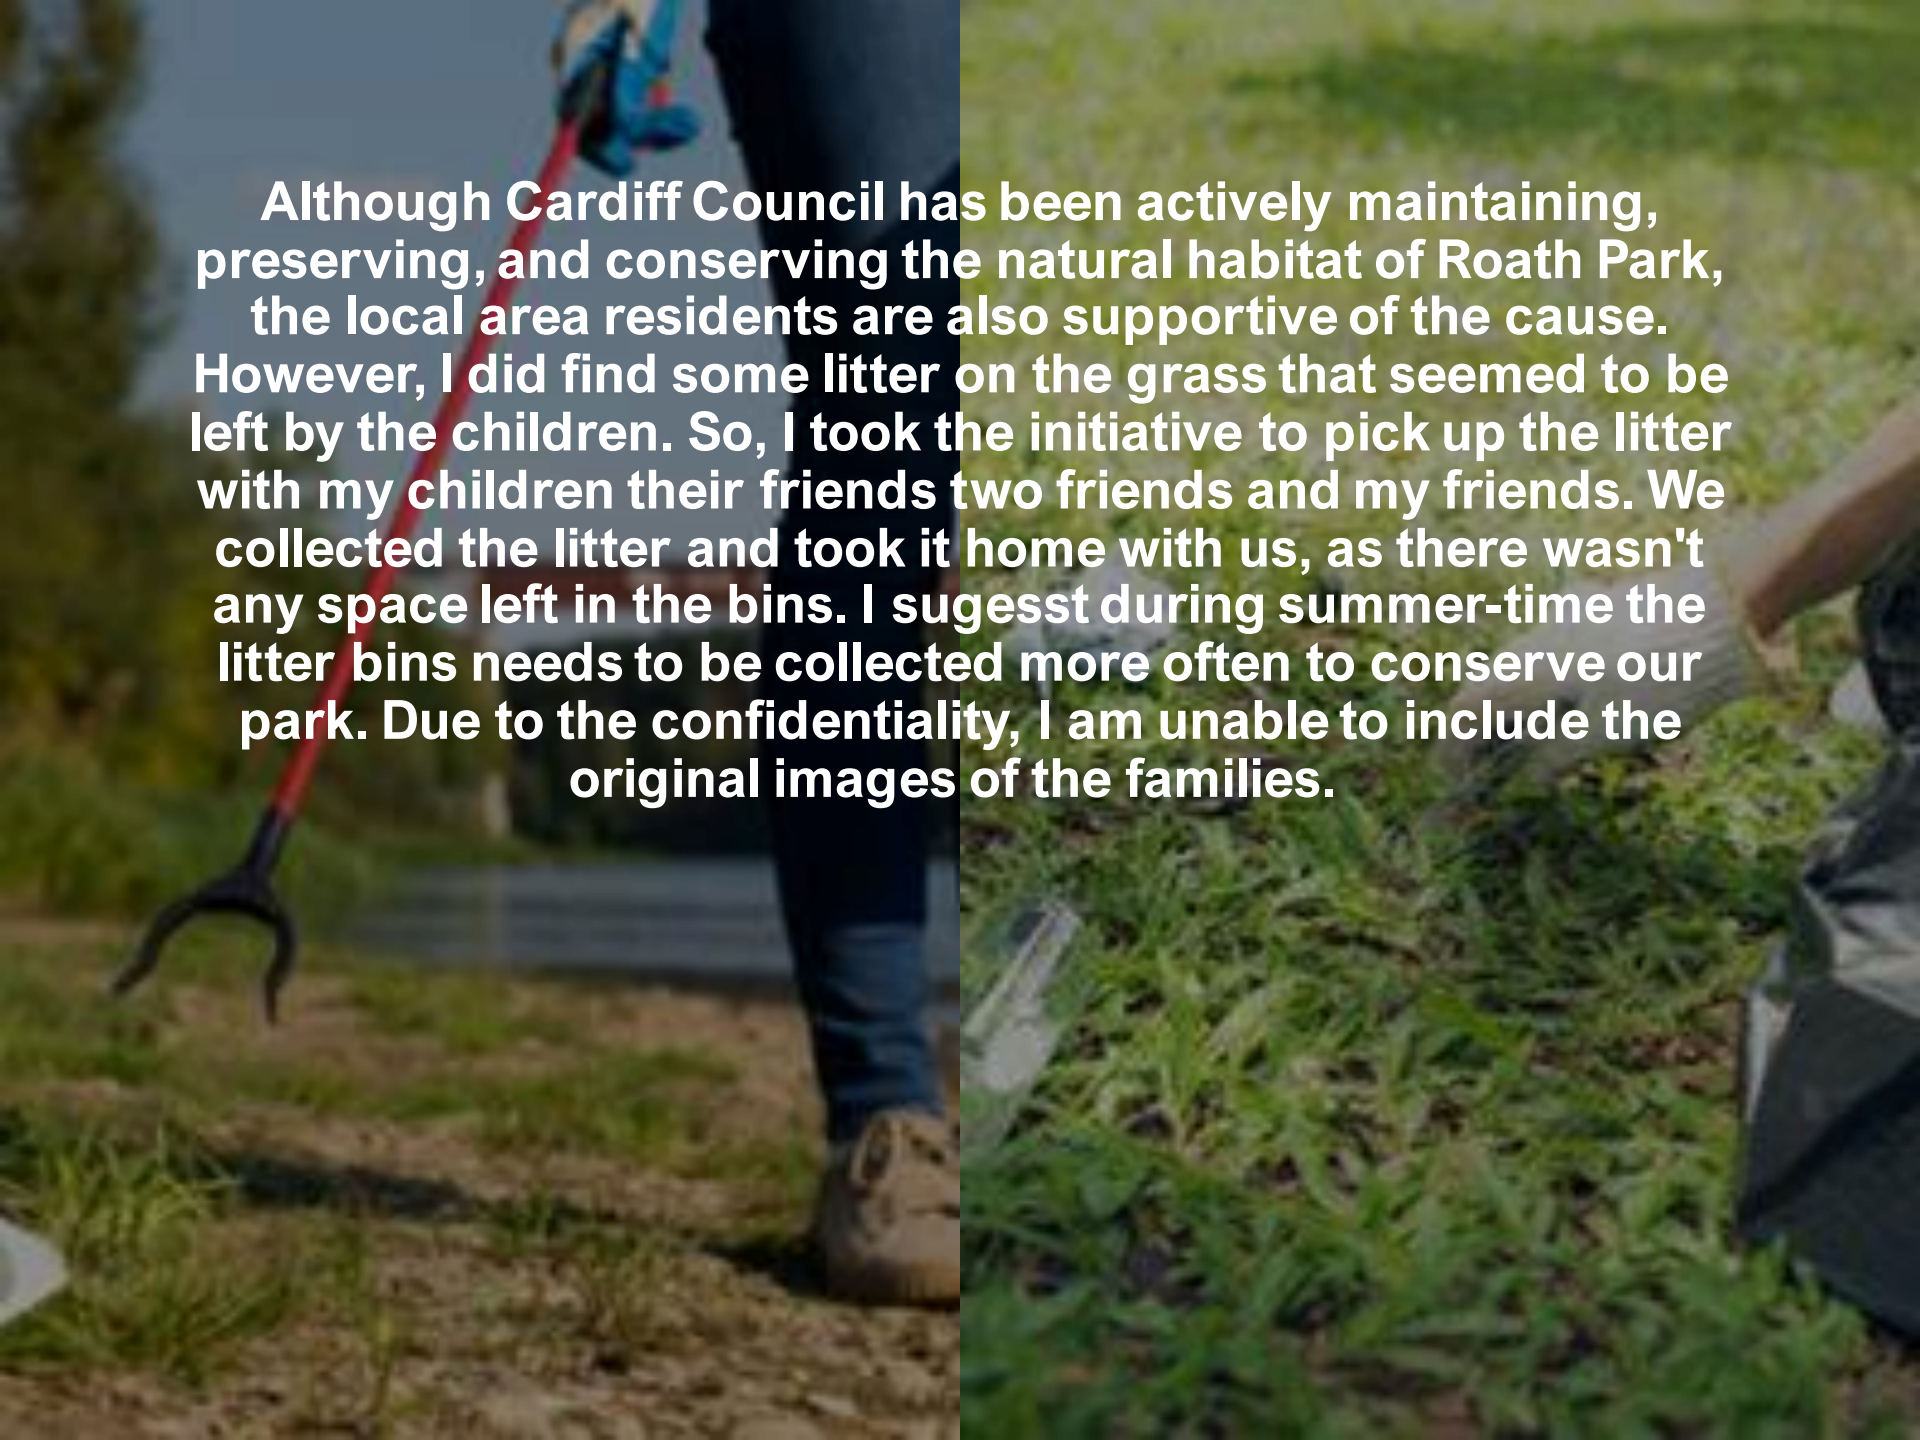

Conserve

The park has a beautiful conservatory made of polycarbonate act as a Green House Effect, creating a warmer and quieter environment for plants to flourish. The conservatory also has a large pond that act as a home to fishes and terrapins.

Squirrel and Terrapins
are the common
inhabitants of the
park.

A person wearing blue jeans and brown shoes is using a red-handled litter picker to pick up trash on a grassy field. The picker has a blue and red head with two curved tines. The person is holding the handle with both hands. The background is a grassy field with some trees in the distance.

Although Cardiff Council has been actively maintaining, preserving, and conserving the natural habitat of Roath Park, the local area residents are also supportive of the cause. However, I did find some litter on the grass that seemed to be left by the children. So, I took the initiative to pick up the litter with my children their friends two friends and my friends. We collected the litter and took it home with us, as there wasn't any space left in the bins. I sugesst during summer-time the litter bins needs to be collected more often to conserve our park. Due to the confidentiality, I am unable to include the original images of the families.

Share

This presentation has allowed me to dive deeper into nature and notice that minor details that I never thought about. It made me realize how my actions are affecting the nature and how my small efforts could lead towards a bigger change. In the hope of a better future, I have shared this project with my children their friends, my friends and their children. Todays, children will be tomorrow's pioneer, therefore it is essential to educate them about how to live sustainably

A photograph of a paved path in a park or garden. The path is flanked by a black metal fence on the left and a stone wall with a bamboo fence on the right. Large, leafy trees arch over the path, creating a canopy effect. The text "Thank you" is written in a white, italicized font across the upper left portion of the image.

Thank you
