Week 5 Discussion NOSS

Post your response to the discussion topic by clicking the plus button below.

↻ **A CHILL SOFTWARE ENGINEER** 2/25/25 11:07AM

This sentence has five words

♡ 3 🗨 0

↻ **HONEST BEAR** 2/25/25 11:07AM

We talked about routing protocols and assignment 2.

♡ 0 🗨 0

↻ **THOMAS SELLWOOD** 2/25/25 11:06AM

We discussed DHCP routing protocols, ping and trace tools, static or dynamic routing protocols, dynamic routing evolution, default gateways

♡ 0 🗨 0

↻ **VALIANT FINCH** 2/25/25 11:06AM

Last week we went over coursework 2 assignment and then went into detail about routing protocols

♡ 0 🗨 0

↻ **A CHILL SOFTWARE ENGINEER** 2/25/25 11:04AM

Week 4 (last week) we discussed the use cases for default routing as well as the use of static vs dynamic routing.

From there routing protocols such as RIP (router information protocol) as well as additions to this protocol to reduce convergence issues etc

- Your fave software engineer

↻ **BEN ROBERTS (2205382)** 2/25/25 11:03AM

I can't remember because I'm half asleep. Was DHCP brought up last week? My gut reaction tells me that DHCP may've been mentioned somewhere.

DHCP's the thing where a device can automatically set IP addresses of others on a network.

↩️ **UNIQUE BEET LE** 2/25/25 11:02AM

We talked about routing protocols along with the specification specification for assignment 2 and what needs to be achieved.

♡ 0 🗨 0

↩️ **NKALIYAMURTHY** 2/25/25 7:31AM

Last week, we discussed about Coursework 2, followed with Active Directory, Routing etc.

Routing:

Static Route: Manually give the Network to be connected

Dynamic Routing (RIPv2):

Automatically connects to the network
