1.0 INTRODUCTION AND OBJECTIVES OF THE EXERCISES

As future Network Administrators who will be require to manage and troubleshoot network problems for any anomalies such as attacks. This case study will require of you to determine analyse a scan data from a system that was compromised. Apply your understanding and knowledge from what you have learnt in the lecture and as well as conduct research using text books, library databases, and/or the Internet to do the following questions:

Task 1:

1. You are asked to explain the Nmap scan result in figure 1.

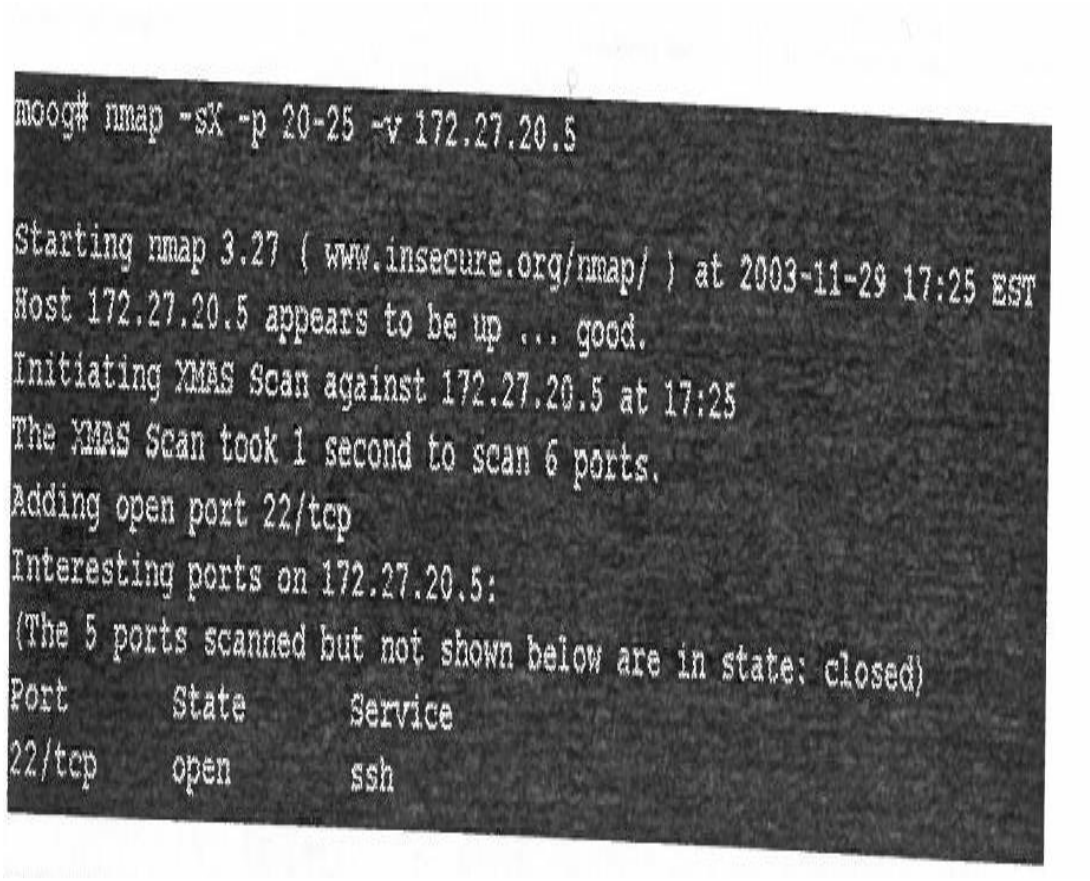

Figure 1: Nmap scan

Give as much details as possible about the scan result.
