

Guest Lecture

Date: 4/12/2019

Room: 101

Guest Lecturer: Chris Bull

Topic: F1 Aerodynamics.

Chris Bull, principal Aerodynamicist at Renault F1 Team shared insight of working alongside Formula 1 Teams.

Chris ~~has been~~ has been working on several F1 Teams, including Honda F1, Brawn GP, Mercedes Petronas.

He started his career as SERP engineer in magotech. After a year he got the opportunity to join an F1 Team as Aerodynamic Design Engineer. He was part of a small team that designed wheel components for a 40% wheel off model using the CATIA software.

Chris said the daily technical challenges and opportunities to learn something new continues to inspire his passion for engineering and Aerodynamics.

Chris was one of the Aerodynamicists who worked on the double diffuser on the 2009 championship.

A radical aerodynamic overhaul led to completely redesigned cars for the 09 season.

JD Definitely the biggest name we've had the chance to hear so far.

The presentation full of technical details with a hint of advice on "How to get there".
