

BMDS7001 Final interactive session

25 May 2022

1. Agile procurement – group feedback

- **15-20 mins:** Based on the assigned reading and reflection questions from last week's self-directed learning activity (reproduced and slightly expanded below), summarise your group's conclusions.
 - Using the scenario that you analysed in CW1 of this module, consider how you would apply the OECD guidance (ICT Commissioning Playbook, chapter 3) if procuring a commercial solution as an agile development rather than an off-the-shelf product or a traditional development contract based on a comprehensive requirements specification.
 - Note what you would apply and how you would apply it.
 - What aspects of the guidance don't you understand or see how you could apply?
 - Are there elements of the guidance that are difficult or impossible to apply under Welsh Government or NHS procurement rules?
- **Approx 50 min:** Groups feed back to the class.

2. Reflection on the first year of the MSc (flexible timing)

- What has gone well?
- What are the 'annoyances'?
- How we can improve next year?
- What should we have more/less of?
- Would mornings be better or worse than afternoons for interactive sessions?
- What will you celebrate for yourself from the first year?
- What advice would you give to the second cohort (who you will meet at the residential in September)?

I will update you on plans as they stand for the residential and the new academic year.

3. Dates for your diary

Mobilising Computable Biomedical Knowledge – free online global conference, 17-18 July: <https://mobilizecbk.med.umich.edu/news-events/annual-meetings/2022-meeting>

European Federation of Medical Informatics special topic conference, Cardiff, 7-8 Sept, **Digital Professionalism in Health and Care: Developing the Workforce, Building the Future** <https://stc2022.org/>
