

MARKING CRITERIA and STUDENT FEEDBACK

This section details the assessment criteria. The *extent* to which these are demonstrated by you determines your mark. The marks available for each criterion are shown. Lecturers will use the space provided to comment on the achievement of the task(s), including those areas in which you have performed well and areas that would benefit from development/improvement.

Common Assessment Criteria Applied	Marks Available	Marks Awarded
1. Engagement with Literature Skills		
Fair review of potential web security issues that does form the foundation for your discussion within your report	15	8
2. Knowledge and Understanding Skills		
You have a basic DB setup with no related data. This suggested that the design was rushed and what would have been useful is a ERD	10	3
3. Cognitive and Intellectual Skills		
You have done the research, but failed to implement your suggestions. If you visited the OWASP top 10 site and examined this in more detail, there are code snippets available to help developers implement potential solution. However, there is some evidence that demonstrates you have the foundation of using prepared statements - but why did you implement this on the login page	15	6
4. Practical Application Skills		
Considering the purpose of this website, you are able to login (even with a SQL Injection Attack), it does appear that you have not been able to manage all relevant data i.e., adding data to the various tables. Also, there are a number of issues with the "GoalKeepers" data where you can not delete/edit data and this extends to the "Defender's" table. Considering you have a delete/update working on others, this is a case of your SQL skills being problematic or starting the assignment late	60	25
5. Transferable Skills for Life and Professional Practice
