Practical Tasks executed appropriately. Screenshots and descriptions were documented. However not all the required screenshots were documented. Not all the ping statuses were documented. Ping, Pre-requisites etc are giving the outcomes of the test results of the acitivites. They need to be documented adequately. On the report, you have described that incorrect ip address was configured which was corrected after the ping test. Could have reasoned out how the wrong ip address was corrected with adequate troubleshoot steps and in-text referrences with literatures.	31.1
