

MARKING CRITERIA and STUDENT FEEDBACK

This section details the assessment criteria. The *extent* to which these are demonstrated by you determines your mark. The marks available for each criterion are shown. Lecturers will use the space provided to comment on the achievement of the task(s), including those areas in which you have performed well and areas that would benefit from development/improvement.

Common Assessment Criteria Applied	Marks Available	Marks Awarded
General Comments		
This is a well executed mobile website that demonstrates your understanding of API's and their implementation onto your mobile site. Ability to customise the front end is apparent via a popup. The only issue and it's a major problem, you cannot expect the end user to "refresh" the site each time you communicate with the API (this problem was discussed in lectures)	100	81
1. Engagement with Literature Skills		
N/A		0
2. Knowledge and Understanding Skills		
For all JS elements of this project, it is nicely annotated - However, due to the volume of annotated code, this has been done after the event (not really acceptable). Also, you have utilised JS from a number of sources - there was some expectation to indicate where additional elements have come from or simply give the author some credit	15	12
3. Cognitive and Intellectual Skills		
You have documented an approach to developing your API's, but is lacking in the "Path" you took in order the API's have been designed/fully working. You should have utilised the console to prove the various API's were working i.e., JSON data that is being sent back to your site - I have no issue with the end product working, but you not making your development clear. Also, you are missing a API developers guide to enable other developers to use your API - again, explained in lecture. For completeness, with regards to the weather API - nice work in getting this working, but you could have rendered more information from the data set e.g., icons	15	7
4. Practical Application Skills		
Firstly - no issue with the ability to dynamically change the mobile sites appearance (work well). With regards to the site itself, lots of interactivity that makes good use of API calls that will render data (except the issue that requires you to refresh the page - not acceptable). Site navigation works well view a set of buttons	70	62
5. Transferable Skills for Life and Professional Practice		
N/A		0

Assignment Mark (Assessment marks are subject to ratification at the Exam Board. These comments and marks are to give feedback on module work and are for guidance only until they are confirmed.)	Late Submission Penalties (tick if appropriate)		81
