

WHY ENGINEERING IS RIGHT FOR YOU!

WHY BEGIN A CAREER IN ENGINEERING?

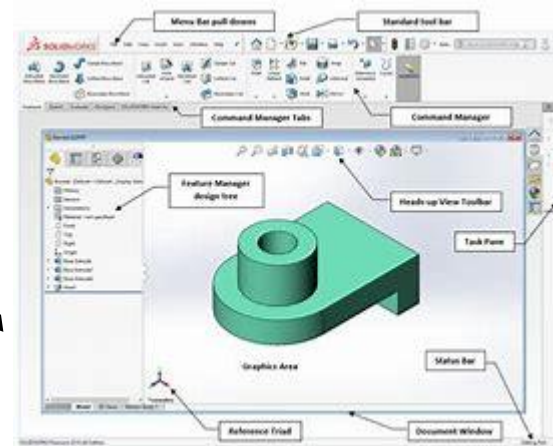

By beginning a career in engineering, you are making a real difference to the world we live in. Engineers design, maintain, and improve so many things that we all depend on and benefit from in our day-to-day lives. A career in engineering can be meaningful and fulfilling for this very reason. You get to meet a lot of new people and see technologies you've never seen before in your life. You'll be in projects that could be life-changing to normal citizens.

SALARY

A usual salary for a graduate engineering job with a high-profile graduate employer in the UK is around the £27,000 to £31,000 mark which is very good as first-year pay. And after a couple of years in your chosen engineering career, salary will increase dramatically you're looking into £100,000, etc.

SOFTWARES AND TECHNOLOGIES

There are different types of software programs and technologies you would use if you chose to take a pathway in engineering for example one of the biggest programming software, a well-used program in the engineering community is called SolidWorks which is a solid modeling computer-aided design (CAD) and computer-aided engineering (CAE) computer program.
