CHARACTER RESEARCH/DESIGN IDEAS

CHARACTER CREATION PROTAGONIST

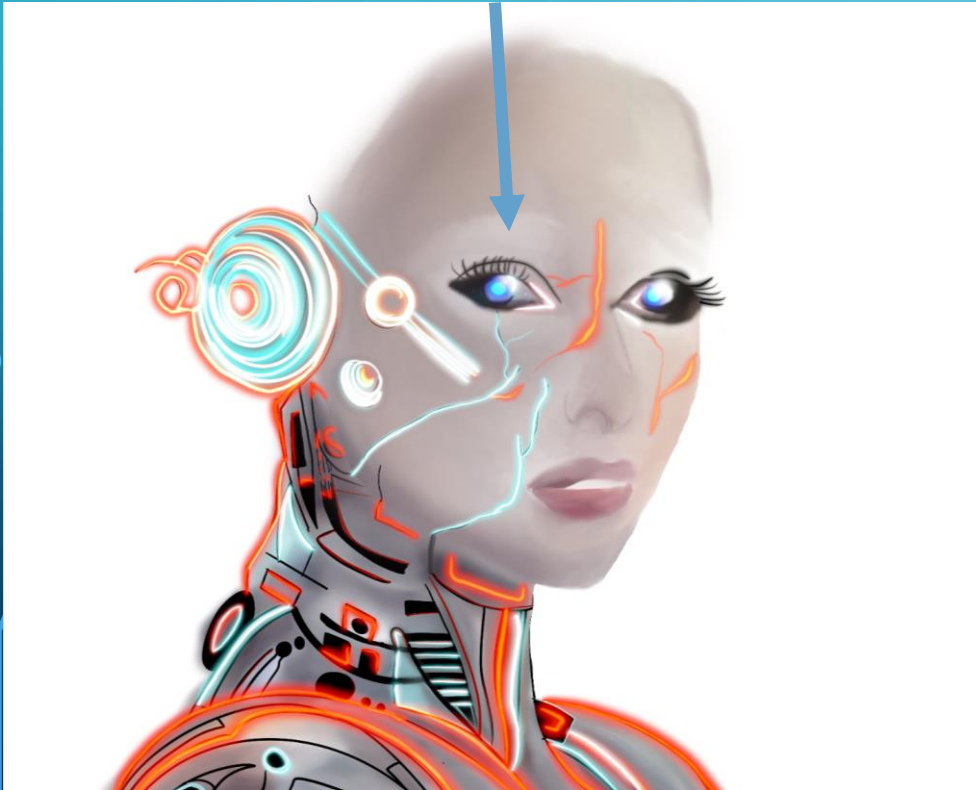

- I used these two photos and created our own version of a human cyborg trying to detail robotic features as well as human features.

CHARACTER DESIGN/PROTAGONIST

A.R.I.A

Automatic Robotic Intelligence Advancements

Blue eye representing
answers which help the
environment

Red eyes representing
an answer which could
be a downfall towards
the environment

Choose wisely!

PROTAGONIST INTRODUCTION

- 100 years from now the world has succumbed to a disastrous defeat, the role of our friendly AI's are here to help put the world back together with their advanced technologies offering humanity to make the right decisions for a better civilisation, offering world changing suggestions the humans must make a decision if they make a correct decision the world becomes a bit better overtime if not more power goes towards the antagonist. Not only does the AI want to help save the planet they also seek to better the health and wellbeing of humanity.

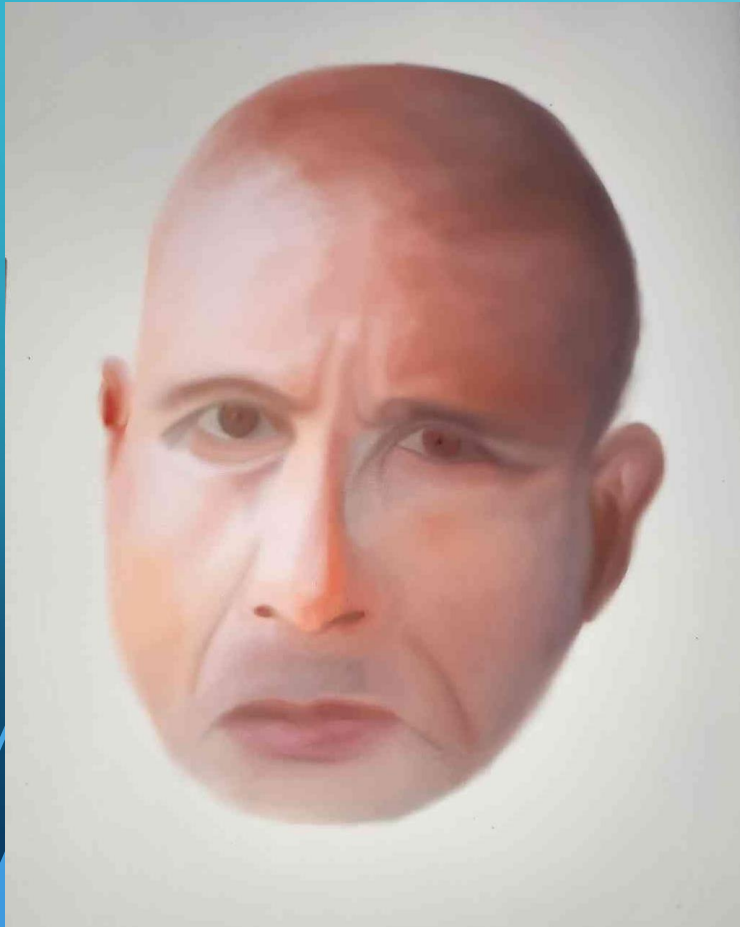

CHARACTER CREATION ANTAGONIST

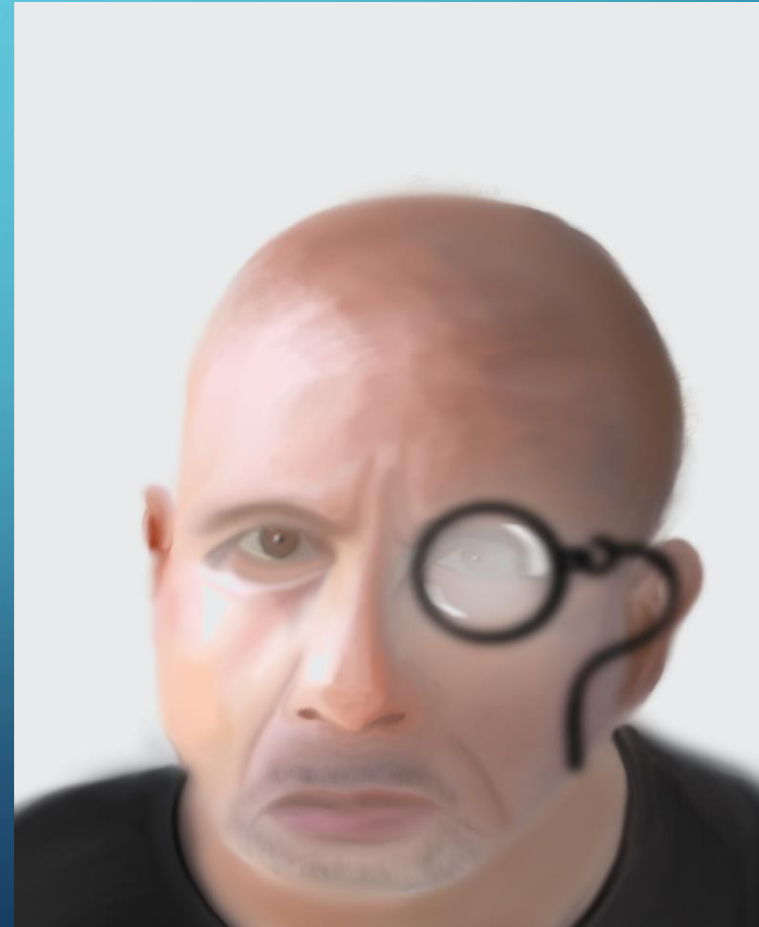

- I researched an array of categories when trying to create our antagonist, we wanted our antagonist to look powerful and wealthy but also look the part of a villain I took the features of these 3 men and created our result.

Before

After

ANTAGONIST INTRODUCTION

The antagonist role is to deter humanity from making correct decisions. He wants to take advantage of the AI's for his own greed as opposed to helping the humanity, he takes joy from the destruction and the power he has over the civilisation and thinks the world is fine as it is- under his authority.
