

MARKING CRITERIA and STUDENT FEEDBACK

This section details the assessment criteria. The *extent* to which these are demonstrated by you determines your mark. The marks available for each criterion are shown. Lecturers will use the space provided to comment on the achievement of the task(s), including those areas in which you have performed well and areas that would benefit from development/improvement.

Common Assessment Criteria Applied	Marks Available	Marks Awarded
General Comments		
On the whole you have a good understanding on how to generate a mobile website that utilises several API's - except you have to "refresh" the webpage in order for the API to render data correct - you cannot expect the end user to do this every time. For completeness, this problem was discussed in lectures. With regards to the end user experience, you need to have a little "rethink" on the sites structure/presentation - it needs a little TLC	100	67
1. Engagement with Literature Skills		
N/A	0	0
2. Knowledge and Understanding Skills		
To be fair, the API's that have developed/utilised work well and from this shows a good understand on how to implement them as well (shame about the refresh). Commenting is a problem as it's difficult to understand your code - or simply no excuse. Also, you have utilised JS from a number of sources - there was some expectation to indicate where additional elements have come from or simply give the author some credit. Finally, when you have "duplicated" code elements - please consider using a function	15	7
3. Cognitive and Intellectual Skills		
The issue around the approach to development was a key feature from CW1 (where you missed the point). Again, there is not a clear/consistent path to you developing/using the APIs on this website. Also, where is the API documentation so that a 3rd party developer could use your API's	15	5
4. Practical Application Skills		
From a point of view that demonstrates a mobile website with API's - you have done a good job and API's do work after a fashion i.e., refreshing the page or could be considered a major problem. Although you have used some API's, there is minimal information on the page - considering you have managed to get it working - there is no reason why you could not have obtained more information from it. Also, on random occasions your mobile site will automatically log you out - only elements noted is the error 404 in the console log window. Finally, you have not provided a means of "customising" the front end (its on the rubric)	70	55
5. Transferable Skills for Life and Professional Practice		
N/A	0	0

Assignment Mark (Assessment marks are subject to ratification at the Exam Board. These comments and marks are to give feedback on module work and are for guidance only until they are confirmed.)	Late Submission Penalties (tick if appropriate)		67
