

Programme

Certificate of Higher Education Skills for the Workplace

Module: Digital Skills and Research Methods
BMSW4003

Lecturer: Dr Olu Adegbite (Olu)

Student Names: Adnan 2132390 Zameer 2128773
Hasan 2132761 Nasir 2127504

Group Presentation –
Research proposal

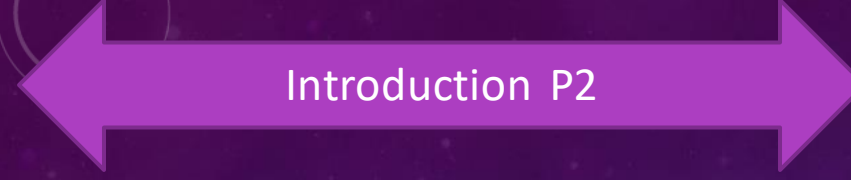

How do students use
technology to
collaborate at UWTSD?

Question

Is there a need to
provide training on how
to use technology to
collaborate at UWTSD?

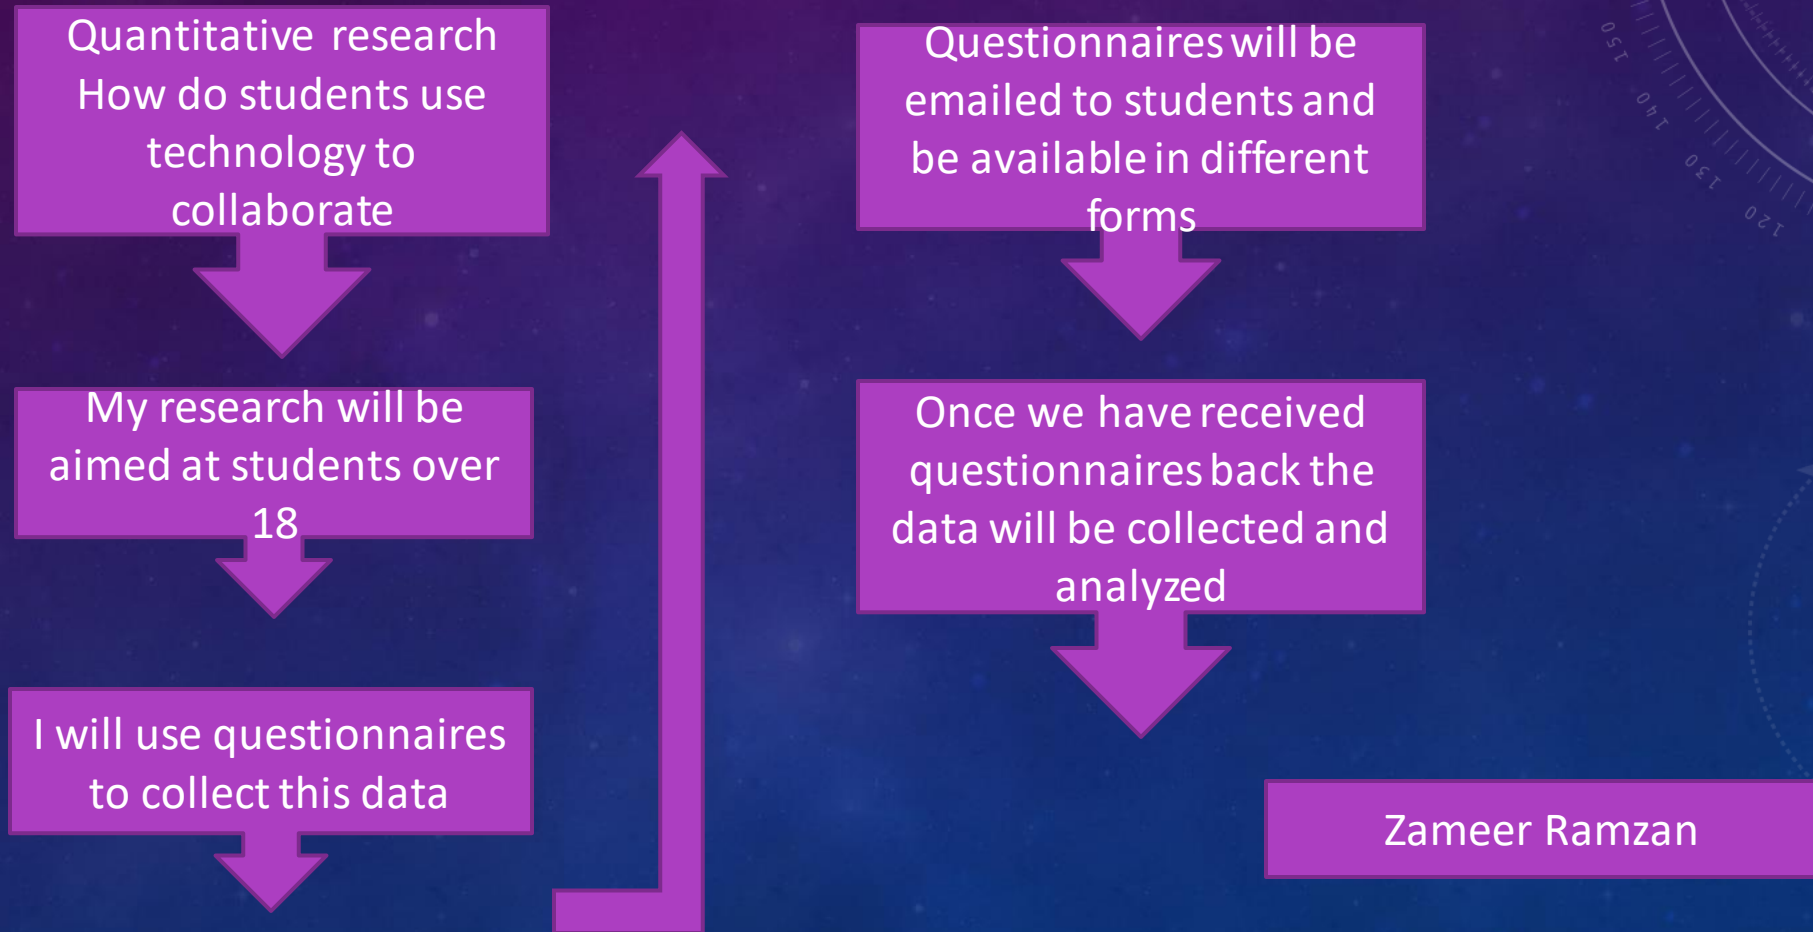

Muhammad Nasir

RATIONALE • REVIEW OF EXISTING LITERATURE.

After studying current literature regarding using technology to collaborate , these are some conclusions:

- Students which engage in collaborative learning using technology are able to engage with peers and establish intellectual relations.(Laal & Laal , 2012)
- Collaborative learning is unique to group based forms of learning but a group component is essential. Collective learning includes participants work that has been prepared in advance for small group events. (Smith&Macgregor,1992)

PROPOSED METHOD •

ETHICAL CONSIDERATIONS

Respect confidentiality
and privacy

Be conscious of
multiple roles

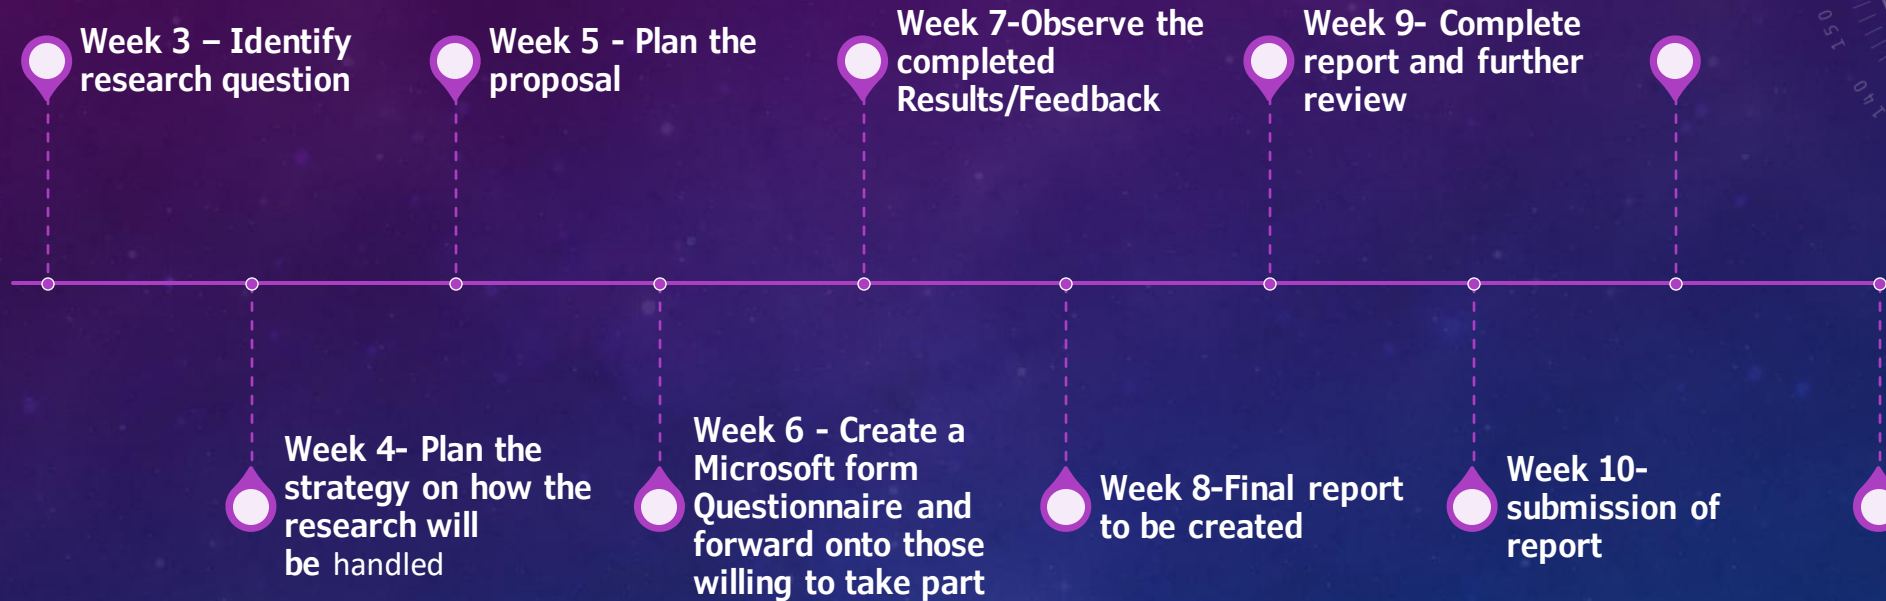

Tap into ethics resources

Follow informed-consent rules

Discuss intellectual property
frankly

Research ethics are important for a number of reasons the six main promote the aims of research, such as expanding knowledge. They support the values required for collaborative work, such as mutual respect and fairness. This is essential because scientific research depends on collaboration between researchers and groups.

RESEARCH TIMELINE

RESEARCH

HYPOTHESIS

We as a group have concluded that training is vital and important on how to use technology to collaborate at UWTSD.

Students become more confident in the way they use technology having gained the training

They can further explore avenues on the tools and facilities made available that they may not have known about prior to the given training.

Example
:Adding Animations to a PowerPoint slide Word art for fancy fonts rather than basic preset text style .
