

MARKING CRITERIA and STUDENT FEEDBACK

This section details the assessment criteria. The *extent* to which these are demonstrated by you determines your mark. The marks available for each criterion are shown. Lecturers will use the space provided to comment on the achievement of the task(s), including those areas in which you have performed well and areas that would benefit from development/improvement.

Common Assessment Criteria Applied	Marks Available	Marks Awarded
1. Engagement with Literature Skills		
Although your have carried out a valid exercise in researching for web security issues. You have identified a number of useful references in addition to the OWASP Top 10	15	9
2. Knowledge and Understanding Skills		
A brief/simple DB with a minimal amount of fields - However, it is in 3NF, but this solution should have been more complex	10	5
3. Cognitive and Intellectual Skills		
From the research you have provided, you have a lively discussion on the identified issue(s), but you could have supported this with snippets of code that demonstrate the security feature - this is somewhat interesting on the discussion with SQL Injection, you have php code that could have supported your discussion	15	7
4. Practical Application Skills		
Generally, the website works (no probs), all tables that we presented could be managed (except the user where you could delete the admin account (no good). You have tried to link in related data via a dropdown, but does not work effectively when you are editing data (linked item does not show). If a little more care was to be demonstrated, you would have seen the "problem" and fixed it. However, your solution is "basic", but does demonstrate CRUD - I could argue that you started this assignment seriously late and as a result a poor implementation	60	27
5. Transferable Skills for Life and Professional Practice
