

- Name: Misjona Kovaci
- Student ID: 2226356
- Module code: LCHS:4002
- Module Name: Digital skills and research
- Topic: The use of digital communication, collaboration, and participation in healthcare .
- Lecturer: Amitave Banik

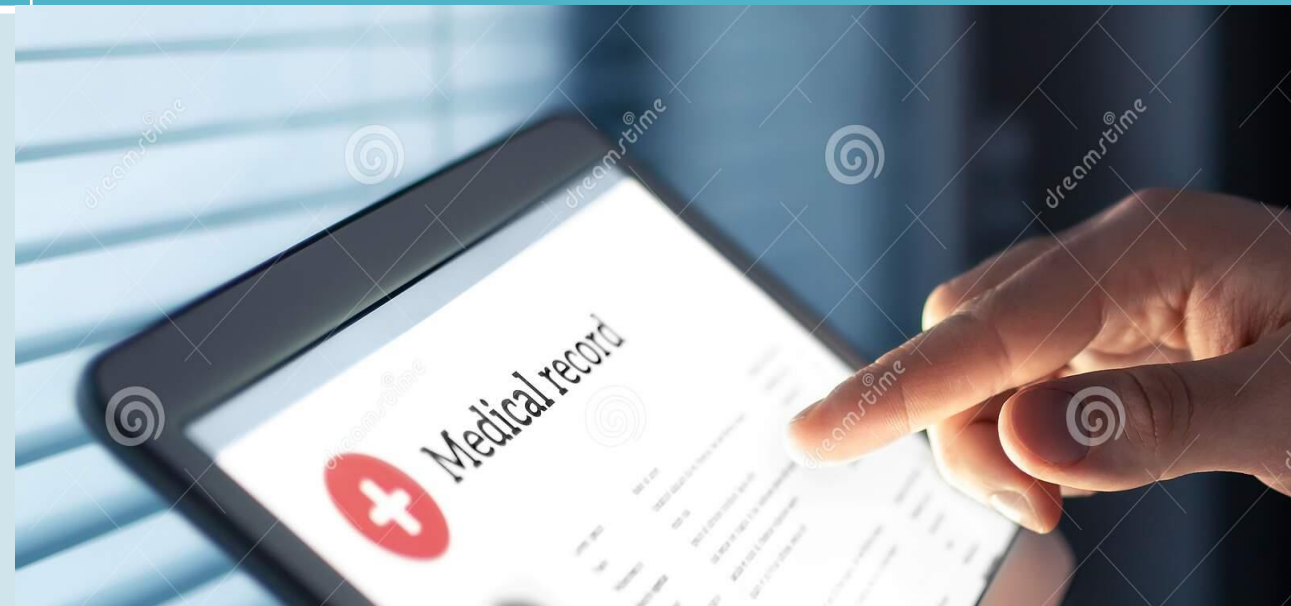

Overview

- UTILISATION OF DIGITAL COMMUNICATION IN HEALTHCARE
- UTILISATION OF DIGITAL COLLABORATION AND PARTICIPATION IN HEALTHCARE
- DIGITAL TECHNOLOGY IN HEALTHCARE
- REFERENCES

- ELECTRONIC COMMUNICATION
- DIGITAL CHANNELS
- HEALTH APPLICATIONS
- With development of electronic communications ,doctors and patients have more productive conversations .Doctors can transfer lab results ,patients data or other information over digital channels (Fager et al ., 2019).
- Patients now can get more informations about their well-being , by accessing different health applications.

- DIGITAL TOOLS
- ACCESSIBLE TREATMENTS
- FAST URGENTS TRETMENTS
- The term “digital collaboration in healthcare “describes the use of digital tools to improve the interaction between doctors and their patients .By collaborating together , doctors and hospitals can better coordinate their services ,make treatments more accessible to patients by saving time and paperwork(Jakobs et al .,2019).The ability to monitor patients from distance on time make more early detection of health problems and start their treatments urgently.

- Digital technology
 - Rapit medical assessments
 - Better treatment programs
- Healthcare has been improved by digital technology ,which has led to better results for patients and reduced costs.
- With improved data collection ,storage,and analysis ,patients have benefited from rapid assessments and more treatment programs.
- Telemedicine and remote monitoring are two examples of how digital technology is expanding peoples access to medical
