## INTERNET SAFETY

The Internet is a tool I can use for learning, entertainment, and connecting with others. While using the Internet, I need to remember to be safe.

I will only visit websites my teachers, parents, or guardians have approved of. I also will not click links on websites or emails sent to me without first asking an adult. While using the Internet, I need to remember to be safe.

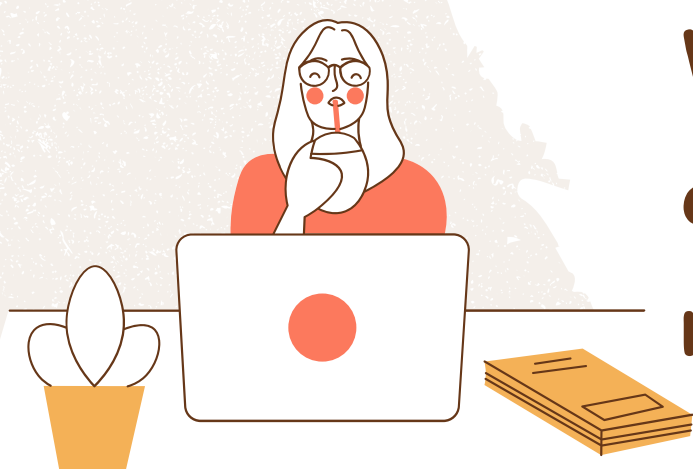

When I make Online friends, they should stay Online. I will not share my personal information, like my name, address, or phone number, with my Online friends. While using the Internet, I need to remember to be safe.

I will use an avatar and a username instead of my real name or picture. If someone asks for my personal information, I will tell an adult.

When I have questions about the Internet, I can always ask an adult for help. The Internet is so much fun when I use it safely!
