

Instructor Briefing

< Check Point Certified Security Administrator (CCSA)
DOC-Manual-CCSA-R81.10-V1.0-1

This instructor briefing lists the feedback that has been submitted for the R81.20-V1.0-1 version of the Check Point Certified Security Administrator (CCSA) courseware. Use this list to make notes in your courseware. This feedback will be incorporated into the courseware with the next scheduled update.

Chapter	Location	Correction/Change
3	Lab 3B-1.2	In the note, remove the word Closed.
3	Lab 3B-1.12	Reword the Tip as follows: If a question mark icon is present in the top right corner of the page and you have Internet access, you can access SmartConsole Help. You can also access SmartConsole Help from the SmartConsole application menu (top-right corner) and from the Support Center.
4	Student Guide - Software Blade Packages	In the instructor slides, replace the link with: www.checkpoint.com/downloads/products/network-security-software-bundles-at-a-glance.pdf
5	Student Guide - Implied Rules	Reword description as follows: The Security Management Server creates the implied rules. The Security Gateway receives the rules during the policy installation and enforces them.
5	Lab 5B-4.19	Replace step 5B-4.19 with step 5B-4.20. Remove step 5B-4.20.
5	Lab 5B-1.2	The Source and Destination in the step do not match the screenshot.
5	Lab 5B-1.2.1	I assume this rule is useless. I did the labs with this rule disabled all the time and experienced no trouble.

Chapter	Location	Correction/Change
5	Lab 5B-2.1	There may be an alert in Gateways & Servers. The B-GW is version R81.10 and the object was set by default to R81.20. The version does change automatically but students are exposed to an alert without notification or accounting for it in the lab document.
5	Lab 5B-2.13	I cannot find an explanation or solution. But it is solved after the first install policy, done in Lab 5B-4.31.
7	Lab 7A-2.12	In the table, change IP Address 203.1.113.11 to 203.0.113.11.
7	Lab 7A-4.1	Add Port 4434 to the table.
7	Lab 7A-6.6	The lab shows NAT Rule 0 (zero), while the Lab Setup Guide shows NAT Rule 6. Somewhere before after Lab 7A-2.5, an install Policy on B-GW is missing to activate NAT from B-INT object.
8	Student Guide - Application Control - Did You Know	Change link to: https://www.checkpoint.com/cyber-hub/network-security/what-issecure-web-gateway
8	Student Guide - Main Features of Application Control & URL Filtering – Bullet 2	Reword bullet as follows: Largest application library with AppWiki – Comprehensive Application Control that uses the industry's largest application library. It scans for and detects thousands of applications and social networking widgets.
8	Lab 8A-3	Add a first step: If the DMZ traffic inline layer is expanded, first collapse it. It must not be copied in the following steps.
