

#BeSeen

VIRTUAL REALITY WORKSHOPS

We want to hear the thoughts and views of young people (16-24) from a variety of backgrounds on mental health and how you like your data to be used

We are researchers from Swansea University, working in collaboration with artists, running workshops where we encourage young people to use VR and other techniques and technology to explore mental health, self-harm and well-being.

Participants will receive a £20 Tesco Voucher, as well as up to £15 in travel reimbursement upon providing a receipt.

If you are interested in taking part in this research please join us for a short session in Swansea at Volcano Theatre, between the 1st and 3rd of June. For more information on the research or on taking part, please feel free to email Dana Dekel at dana.dekel@swansea.ac.uk

This study has received approval from Swansea University Medical School Ethics Sub-Committee [no. 2020-0027]
