

MARKING CRITERIA and STUDENT FEEDBACK

This section details the assessment criteria. The *extent* to which these are demonstrated by you determines your mark. The marks available for each criterion are shown. Lecturers will use the space provided to comment on the achievement of the task(s), including those areas in which you have performed well and areas that would benefit from development/improvement.

Common Assessment Criteria Applied	Marks Available	Marks Awarded
General Comments		
Generally, you have a website that is able to display data, but not be able to carryout any DML (some runtime errors are noted) - if you were stuck/had problems you should have had a chat with the lecturer as if one problem could be sorted, you might have had a more functional system. Report on SQL Injection is brief, but informative (some elements in the report are irrelevant - did you check the rubric)	100	42
1. Engagement with Literature Skills		
Although you have carried out a good research achivity, you will find that if you read the rubric carefully, the focus should have been on SQL Injection and how to prevent it (albeit briefly) - some elements are somewhat irrelevant	15	7
2. Knowledge and Understanding Skills		
Database design does show a good 3NF solution, Diagram tool within PHPMysqlAdmin complements the design	10	10
3. Cognitive and Intellectual Skills		
Considering you have discussed SQL Injection, you should have demonstrated how to hack your own website. Prepared statements are also discussed and implemented within your own solution (via login) - shame you did not get DML operations working correctly	15	7
4. Practical Application Skills		
	60	18
5. Transferable Skills for Life and Professional Practice		

Assignment Mark (Assessment marks are subject to ratification at the Exam Board. These comments and marks are to give feedback on module work and are for guidance only until they are confirmed.)	Late Submission Penalties (tick if appropriate)		42
	Late Submission ?		
	1st/2nd/3rd attempt?	1st
