I choose the Penllergaer pound as I have many great memories from this area. I would go on long walks with my dog, I would also take my son there who loves to explore the outdoor environment as he is very curious.

Litter Problem

While I was visiting the pond, I noticed the incredible amount of litter on the floor. I decided to help clear this litter and also my son wanted to get involved so it was a great opportunity to teach him a little bit about the importance of putting litter in the bin.

The Four Little Ducklings

There was once a family of ducks who lived in a pond. There was a mummy duck and four little ducklings.

One day the little ducklings decided to stretch the legs and go for a walk exploring. As they were exploring, they waddled past some litter on the floor. They were shocked that somebody would leave litter in their home. So, one little duckling decided to clear it up and put the litter in the bin. As the ducklings dragged the litter to the bin, they noticed they were too little to put the litter in the bin.

One little duckling had an idea to collect twigs and make a ladder. So, all the little ducklings worked together to build a ladder. One by one they carried the litter up the ladder and threw the litter in the bin. The pond was all clean, so the little ducklings went back to their mother to tell her their incredible story.

The End

To be continued...
