

ASSIGNMENT TITLE

Digital skills and research methods.

Student Name: Shamima Akter Rumi
Student Number: 2223220
Module Number: LCHS4002_BRIM
Lecturer Name: Azida Zainol

Introduction

Research Question: Are UWTSD students confident in using Digital Skills?

Digital skills are the skills you need it for study and work in our fast - evolving digital world. These days, Digital skills are a step towards learning a lot of new other things. It is improving students' confidence using technology for study and work in everyday life. The student who starting their academic life, they will need digital skills knowledge for their everyday lesson. Students with digital education become more comfortable with researching, communicating, accessing, consuming, and sharing content online. The most positive effect of technology on students is that it helps and enhances learning process and give them various sites option where they can find information if they are stuck.

Evidence

Student at UWSTD confidently use HWB app where they find all the important information such as:

student use library to find relative information and search for books.

- Check every lesson topic on Moodle.
- Student use One drive for their presentation.
- Student can communicate with teacher and the group member by using email.

Propose Method

A research proposal describes what you will investigate, why it's important, and how you will conduct your research. Most proposals will contain at least these elements:

- Title page
- Introduction
- Literature reviews
- Research design
- Reference list

At the end of the presentation participants will be question by UWTSD students and it will be completed by the survey. There will be five questions to answers and the types of questions will be: Open question, Closed question, Rank question and Likert scale questions.

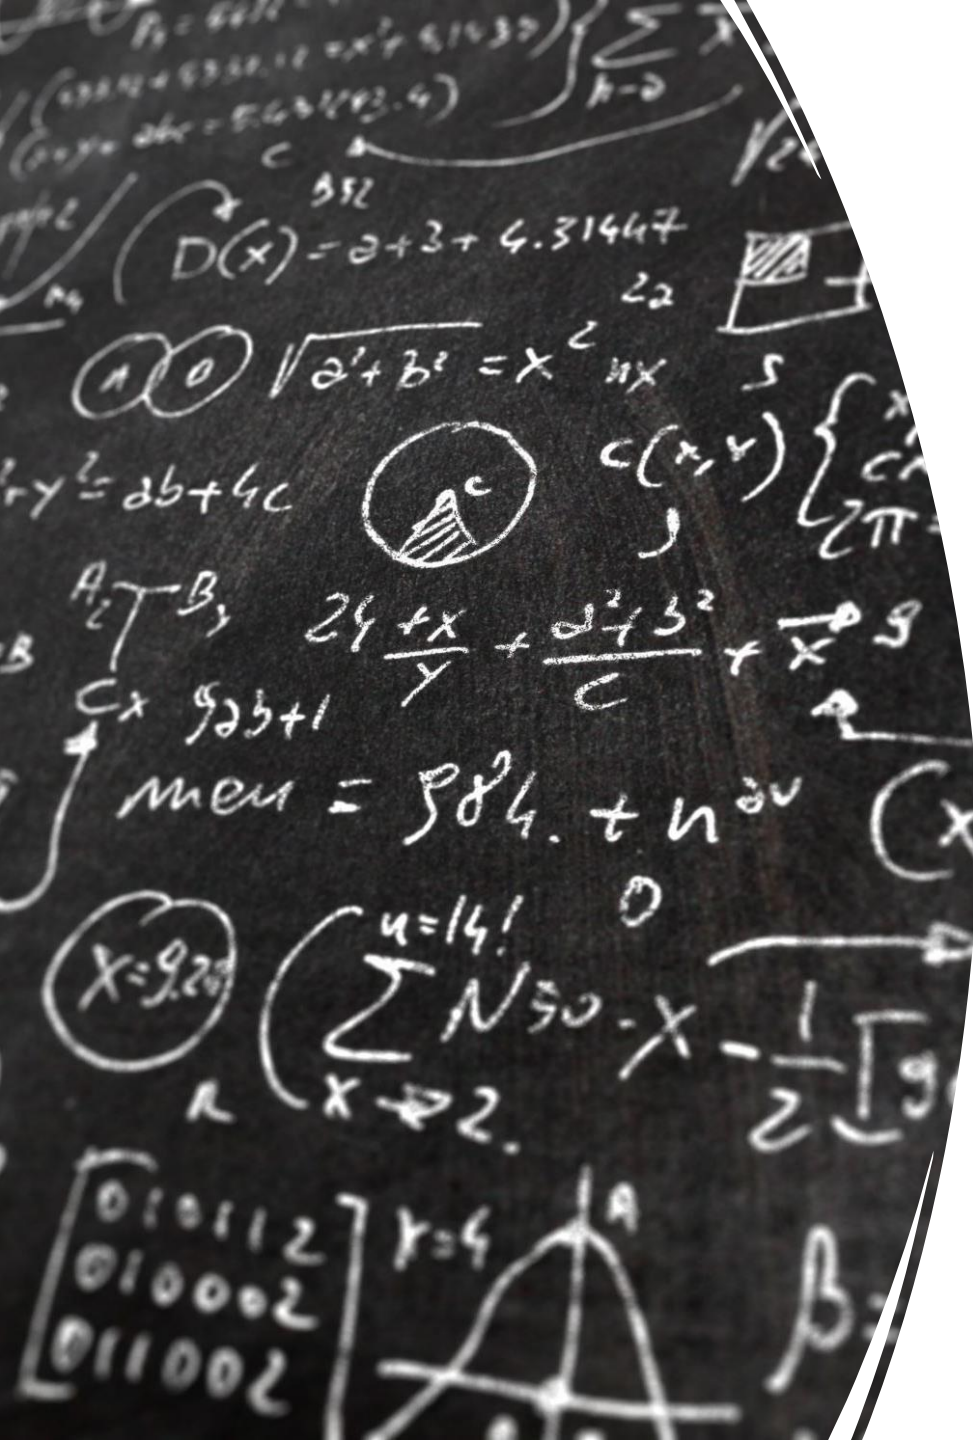

Ethical Consideration

- Student at UWTSD who will take place in the survey they must consent to take part voluntarily.
- Ensuring confidentiality of data and respect for others is important.
- Student of UWTSD cannot share any data to the outside of the Organisation.

Rationale

In order to improve Student using digital tools for learning, it is essential to help them understand why technology is important in their professional lives as lifelong learners.

Hypothesis

- According to a survey more than 550 students said the switch to online assessment was positive than negative. By comparison, 49 percent of students said they are confident of using digital skills to benefit from online learning with 42 percent confident.

In my opinion in UWTSD student are very confident using digital skills for their everyday work. HWB app makes student life so much easier.
