Introduction

- This presentation will outline the various aspects related to academic and employability skills.
- Being **manger in Deconstruction** , I will make sure there is personal developmental plan related to the operations in the business (Benzaghta et al., 2021).
- It detail about SWOT analysis which is faced by me in the Industry (Bhagra and Sharma, 2018).
- It discussed different advise which is given to me being a manager in deconstruction business and improve my interpersonal skills in wider extent.

Deconstruction

- It is the term which relate to the unpacking in the simpler terms. It is also term as the technique of problem solving through Deconstruction.
- It is the not saying the meaning of Demolition but analysis of something which gain the true significance of the business.
- The main elements can be considered related to the literary and philosophical value in the business.

Graham Gibb Reflective model

- For this presentation, I will apply the Gibbs 1988 model for reflective learning cycle and help my academic writing and employability skills course (Bintani, 2020).
- It includes the description of the situation, examining the feelings, assessing the experience gained from the **manager role in deconstruction sector and regain the stage, I am currently working**, analysis, conclusion and further learning to improve my ability (Bhagra and Sharma, 2018).
- It includes the different phases like description, feelings, evaluation, and analysis.

Continue..

- Description- Here, I gained the academic writing skill , and utilized my development plan and maximize the time efficiency and implications or to-do lists.
- Feelings- My emotions towards learning theoretical concepts and employability skills is divided. I developed the knowledge of stress and significance of time, which ultimately enhanced my confidence level (Gregg, 2018).
- Evaluation- Through the modules taught in the class, I learned about grammar, vocabulary and sentence structure (Grit, 2019). I am now able to easily process the research topic and focus on specification related to it.
- Analysis- At the end of the course , I improved my academic and employability skills as examining of sources, creation of outline, drafts and editing (Gregg, 2018). I got the better comprehension about writing a project and progress the requirements as manager in deconstruction.

SWOT analysis

Strength

- The construction industry is having the strong capacity of innovation and player in UK deconstruction department.
- It is able to formulate the techniques which is having both extensive analysis as per measuring the success.
- There is gain in the brand name as per the market objectives.

Opportunities

- The company look for the chance in the sales and profitability by spreading out the functions .
- The technology is advancing the content of manufacture products.
- The lower expense raise the rate which is delicate for the customers.

Weakness

- Construction industry is not having any existence in the other foremost of the business.
- The entrance of other competitors is having the first mover advantage.
- Old methods in the process of manufacturing its deconstruction phenomena

Threats

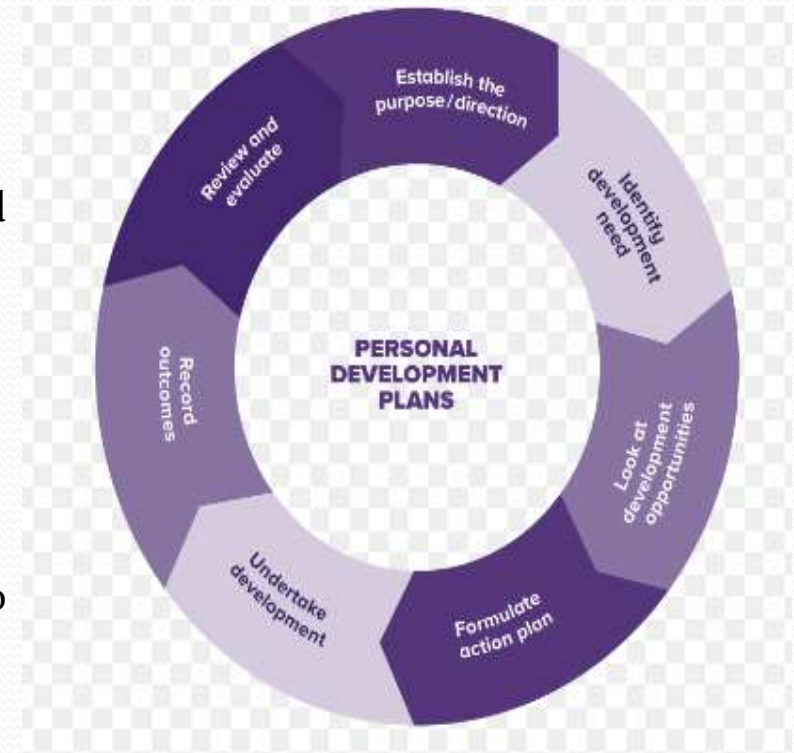

- There is change in the government guidelines regarding deconstruction production which is the largest hazard for the business.
- By rapid change in the advancement of technology, new innovation increase the profit which is danger in whole.
