

Conclusions & Recommendations

anticipated outcomes from aims and objectives as if taken place

eg. by the end of this research proposal it is anticipated that river will have been crossed & boat will have been

constructed

It is anticipated achieved aim & milestone will have been achieved.

anticipated

Outcomes will be impacts of cement prod on chinese environmental health will have been established.

The same for cement distribution & Application

Recommendations will be made on how to improve environmental health to the face of highest rate of cement production in China - which is the highest in the world at the moment.

& These recommendations may inform Chinese Gov policies and officials who are involved in decision making in conjuncture with other stakeholders in the industry.
