

Dental care in 1948 vs in 2024

Eugenio Ananias

Introduction

The purpose of this presentation to illustrate the development of a dental surgeon who are also known as a (dentist) in the health of social care sector in the uk.

The improvement of this survive will be discussed , from the nowadays to dating back to the 1948 and will be compared .

What is a dentist / role of a dentist ?

Dentists are medical practitioners who treat oral and dental illnesses, injuries, and work with patients to avoid dental health issues. As a dentist, you will perform dental and surgical operations, assess patients' oral and dental health, and provide guidance.

When was dentistry founded ?

>Dentistry was founded in the 7thousands B.C. making it one of the oldest medical professions. However it wasn't until the 5thousands B.C.that descriptions relate to dentistry and tooth decay where available to the community.

What is the dentist like in 1948 ?

During the middle ages dentistry was not a separate profession during the middle ages and the 19th century ,instead ,general practitioners or barbers would frequently be undertake dental operations , typically barbers would only extracted teeth to relieve discomfort and infection of teeth. However during this time of century dental equipment wasn't invited leading to surgoes having to use pliers to remove rotten teeth without any anaesthetic to ease pain.

How many was affected in 1948 ?

. During 1948 a lot of individuals were affected by dental care this is because of sanitary issues and lack of equipment

. ten thousands of people died from botched treatments , infections and other reasons

What is dental care like in nowadays?

>In this day society dental care is a lot more advance with technology and tools .For example a x-ray machine is good to identify if you have any rotting of teeth to show if you need a filling to reduce the tooth becoming more damage .

> Another example is nowadays dental surgeons are using anesthesia to help you not feel any pain in any medical producers however in 1948 they didn't any anesthesia when extracting teeth .

> accessibility for example dental care is now accessible to any working class , middle class and upper class .

Conclusion

From this presentation i have learnt that density has approved over 1948 until now such as medication and tools .
