ASSIGNMENT 3

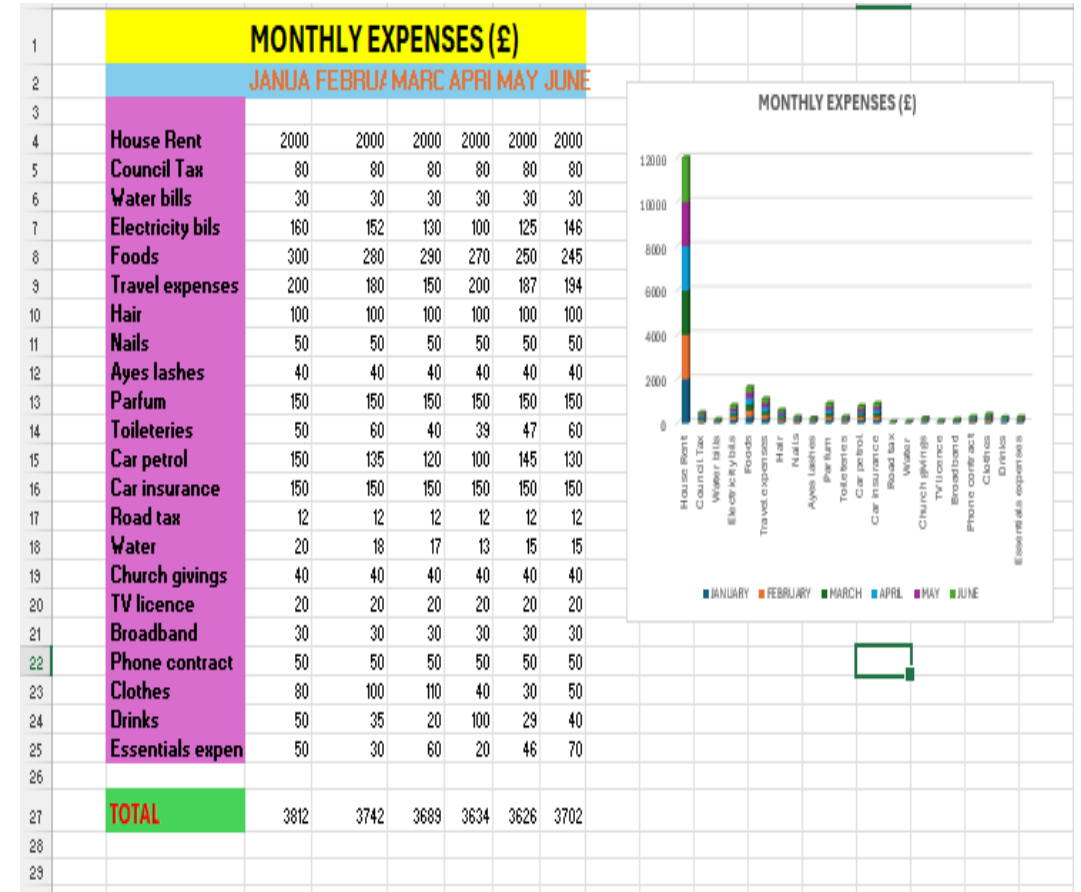

Reflection

This is the monthly expenses from January to June and all bills included. I used the chart to see the highest amount spend.

Charts are visual representations of data used to make it more understandable.

Charts are also called graphs and visualizations.

Data Bars are premade types of conditional formatting in Excel used to add colored bars to cells in a range to indicate how large the cell values are compared.

Reflection

The power bank save energy and keeps my device charged when I am somewhere that I cannot charge my phone. It is very helpful for my digital life.

1. It is an emergency backup battery for tablets, laptop, smartphones and others. It is an emergency backup to prevent my phone from dying during critical situation, or power outages.
2. Travel Essential to keep navigation apps, digital boarding passes and camera running during long trips.
3. Business Continuity to ensure remote work can keep laptops and phones powered during outdoor meeting or commutes.
4. Battery longevity to reduce stress on my phone's internal battery by preventing deep discharge cycles.

Reflection

This is my laptop, it helps me to do my homework, Assignment, Research, and so many things.

A large, irregular pink brushstroke shape on the left side of the image, serving as a background for the title.

The purpose of Laptop

For many people, a laptop is not just used for a single reason. It can serve to be your main workstation, your entertainment zone, and a tool that you can use to communicate with your friends and family. Newer models are bound to be more adept at all of these jobs. This is down to the fact that they are equipped with better technology and have been designed with these purposes firmly in mind. If you want to do one of these tasks ahead of the others, it is worth choosing a laptop with the specific function in mind.

Reflection

This is my coffee machine; it helps me to make coffee every morning when I wake up; I do have 2 sirop flavours which are Vanilla and Caramel to add in my coffee; I do have Barista Oat milk and Almond so I can make:

- Vanilla Oat latte
- Vanilla Caramel latte
- Almond Vanilla latte 4. Almond Caramel latte to start my day.

In 1935, he invented the first automatic *coffee machine* which substituted compressed air for steam: the *illetta*, the predecessor of today's espresso machines.

If any 'relationship' exists at all with such robots, then it is the same type of relationship that we have towards our *coffee machine* or *car*.

Reflection

This is my fan, it helps me during summertime to get some fraiche air, and I can increase it from 1 to 3 to get more power on it.

❖ People under a ceiling fan can feel several degrees cooler than the room's actual temperature. By running your ceiling fan in the direction for cooling, you may rely on air conditioning less and possibly help save energy in your home.

❖ In summer, you want your ceiling fan to push cold air down toward the floor. It takes energy to keep the house cool, but ceiling fans make people feel cooler without raising your energy bill. The breeze makes perspiration on your skin evaporate, creating a wind chill effect.

❖ As mentioned, ceiling fans cool people, not rooms. They just affect airflow in the room they're mounted above. So, when you leave the room, save energy by turning off the ceiling fan.

Which Way Should a Ceiling Fan Rotate in Summer & Winter? | Constellation
