INTRODUCTION

This handbook provides you with information about your Programme of Study for the academic year 2021/22. Module descriptors are presented in the accompanying Module Directory document.

Because of the ongoing Covid-19 situation, the University has made a number of changes for the 2021/22 academic year, e.g. in relation to how you can access facilities on our campuses, and how your programme will be delivered.

Access to the University's physical facilities will be led by Government and Public Health advice. Essential updates can be found here (<https://uwtsd.ac.uk/coronavirus/>) and on the [Student Hwb](#). Please also make sure that you read the Student Bulletin for essential updates as a change in status may affect how your programme is delivered.

As a result of these circumstances, most programmes will be delivered through in-person and blended online delivery. This approach will work to ensure that if you are shielding or self-isolating you will still be able to access your studies. If you have any specific needs arising from the current circumstances, we ask that you make Student Services and your programme team aware so that we can work to support you.

The University has made every effort to make the information as full and as accurate as possible, but you should note that minor changes in the organisation of modules between the planning stage and the actual teaching are inevitable. We shall try to keep any such changes to a minimum, and you will receive advance warning in the event of any alteration.

FEEDBACK

Feedback on your programme of study and modules is welcome and important and will help us to improve and enhance your learning experience. You can give feedback in a number of ways: through the academic representatives for your programme of study, through module evaluation questionnaires, through informal meetings with your academic support tutor, teaching staff, or Programme Manager, through focus groups to gain feedback from students on particular issues, or through the Students' Union. If there are issues, then it is important that you share these with us so that we can address them. We would also be grateful if you would let us know about any changes that you think might be helpful if introduced into future handbooks. Your opinion is valued.

PROGRAMMES OF STUDY AND PROGRAMME MANAGERS

This handbook covers the following Programmes of Study. The name and contact details of the Programme Managers are also listed below.

Programme of Study	Programme Manager	Tel. No.	E-mail
BSc Architectural Technology	Ryan Stuckey	+441792481000 x4308	r.stuckey@uwtsd.ac.uk
	Gavin Traylor	+441792481000	g.traylor@uwtsd.ac.uk
BSc Building Surveying	Deborah Hughes	+441792481000	d.hughes@uwtsd.ac.uk
BSc Civil Engineering	Allan Nantel	+441792483696 x4696	alan.nantel@uwtsd.ac.uk
	Jamiu Dauda	+441792481000	j.dauda@uwtsd.ac.uk
BSc Construction Management	Allan Nantel	+441792483696 x4696	alan.nantel@uwtsd.ac.uk
BSc Quantity Surveying	Deborah Hughes	+441792481000	d.hughes@uwtsd.ac.uk

SUPPORT DURING YOUR STUDIES

A member of staff will be identified at the beginning of the academic year to act as a point of first contact for support issues. Further support can also be accessed through the [Student Services](#) department.

EXTERNAL EXAMINERS

All taught Programmes of Study which lead to an award of the University have at least one External Examiner. The principal purposes of the University's external examiner system are to ensure that:

- the standard of each award is maintained at the appropriate level;
- the standards of student performance are comparable with standards on similar programmes or subjects in other UK institutions with which they are familiar;
- the processes for assessment and the determination of awards are sound and fairly conducted.

Students may request a copy of the previous year's External Examiner's Report for their programme of study by contacting the Programme Manager.

The current External Examiners for the Programmes of Study are:

Programme of Study	External Examiner for 2021/22 (forename/surname)	External Examiner for 2020/21 (if different to current)
BSc Architectural Technology	TBA	Cathy Higgs Anthony Taft
BSc Building Surveying	TBA	Cathy Higgs Anthony Taft
BSc Civil Engineering	TBA	Cathy Higgs Anthony Taft
BSc Construction Management	TBA	Cathy Higgs Anthony Taft
BSc Quantity Surveying	TBA	Cathy Higgs Anthony Taft

Please note that students are not permitted to make direct contact with the External Examiners without permission and to do so may be considered a disciplinary offence.

ACADEMIC YEAR 2021/22

The academic year 2021/22 will be divided up as follows:

Induction	20/09/21 - 24/09/21
Semester 1:	20/09/21 - 21/01/22
Exam Period 1:	10/01/22 - 21/01/22
Examining Boards:	31/01/22 - 11/02/22
Semester 2:	24/01/22 - 08/07/22
Exam Period 2:	09/05/22 - 20/05/22
Examining Boards:	30/05/22 - 16/06/22
Re-sit Period:	18/07/22 - 22/07/22

Please note that dates are subject to change depending upon developments relating to the Coronavirus/Covid-19 pandemic.

INFORMATION ABOUT YOU AND YOUR PROGRAMME OF STUDY

Information about you and your programme of study is held by the University on a central Student Record System managed by the University Registry. It is essential that the University Registry has an accurate record of your personal details at all times. It is equally important to ensure that you are enrolled on the correct Programme of Study and on the correct modules and that you read and agree to the Enrolment Agreement.

My Student Record / MyTSD

You can view your personal details on [MyTSD](#) and make requests to amend data when your circumstances change. It is important to keep your personal details up to date. You can use MyTSD to:

- enrol for the new academic year
- generate a 'Confirmation of enrolment' letter
- generate a council tax exemption letter and/or bank letter
- view enrolment and module registration details
- amend your address
- check your financial information (e.g. fees due)
- submit a programme change request
- apply for 'Extenuating Circumstances'
- check your module results and examining board decision
- request to withdraw from your studies

Failure to keep your personal details up to date can result in a range of problems including:

- delays in obtaining your student loan;
- failure to contact you in an emergency;
- not being able to borrow materials from the Library and Learning Resources; and
- not being able to use the Information Technology services;
- potential non-compliance with visa regulations.

Please take time to check your enrolment details on MyTSD.

DISCLOSURE AND BARRING SERVICE (DBS) – ENHANCED

If your programme involves you coming into contact with children or vulnerable adults, you will be required to undertake a DBS check (Enhanced). Further details will be provided by the University Registry or Programme Manager.

As part of each programme's procedures relating to DBS, continuing students will normally be required to inform their Programme Manager immediately of any change to their criminal convictions' status.

You will also be asked to complete a formal self-declaration during the enrolment period at the beginning of the academic year, which confirms your criminal conviction status.

MODULAR TERMINOLOGY

Level (of Study):

A level is assigned to each module to define the standard of its academic demand in line with the National Qualifications Framework which incorporates both Further Education and Higher Education.

The level is not necessarily synonymous with a year, though very often Level 4 will be the first year of a Programme of Study, Level 5 will be the second year, and Level 6 will be the third year. The basic characteristics of the relevant levels of study are outlined by the Welsh Assembly government and available on their website:

<https://gov.wales/sites/default/files/publications/2018-02/level-descriptors.pdf>

ASSESSMENT

At the start of each module, tutors will provide on Moodle full details of the means by which you will be assessed in that module. This will include a full assessment brief and guidelines on the criteria that will be used for marking your work as well as clear information about when the assessments are due and the turn-around feedback time for the assessments. It will also detail how you will be able to discuss the feedback on your work and your performance and what to do if you have any questions.

All assessed written coursework needs to be submitted in electronic copy via Turnitin; alternative instructions will be provided by the Programme Manager for any forms of coursework that cannot be submitted via Turnitin.

The University offers programmes in both English and Welsh. The normal expectation is that you will be assessed in the same language in which the programme or modules are delivered. If you have been taught in English and wish to be assessed in Welsh, or vice versa, you should consult your Programme Manager about the options available to you.

You will receive confirmation of your assessment marks at the end of each year. Any marks released prior to formal approval by the Progression / Award Examining Board are provisional.

Extenuating Circumstances

If you believe that there are extenuating circumstances which may have adversely affected your ability to complete coursework or examinations, you should follow the University's procedures for Extenuating Circumstances for Taught Provision, which

can be found on the University's website and forms part of the *Mitigating Circumstances Policy*:

<http://www.uwtsd.ac.uk/academic-office/procedures-for-academic-appeals-complaints-and-other-student-cases/>

Additional needs in terms of assessment

If you have any additional needs in terms of assessment, it is your responsibility to liaise with Student Services regarding those needs at the start of the academic year, so that a Statement of Compensatory Measures can be drafted in line with the University's procedures for assessment of students with additional needs.

<http://www.uwtsd.ac.uk/services-for-disabled-students/>

Academic Appeals

Information about how to appeal is provided in the 'Academic Appeal Procedure' which forms part of the *Academic Appeal Policy* associated with Chapter 12 of the Academic Quality Handbook, and in supporting documentation published on the Academic Office section on the University's website:

<http://www.uwtsd.ac.uk/academic-office/procedures-for-academic-appeals-complaints-and-other-student-cases/>

Additional advice is available from the Students' Union. It is very important that you note carefully the grounds on which appeals may be made and submit your appeal on the appropriate form because incomplete or ineligible appeals cannot be processed.

Assessment Regulations

The rules and regulations that govern the assessment of your Programme of Study are available in Chapters 6 and 7 of the University's Academic Quality Handbook, a copy of which is available on the Academic Office section of the website:

<http://www.uwtsd.ac.uk/academic-office/academic-quality-handbook/>

Responsibilities of students in relation to the assessment process

You are responsible for ensuring that:

- i) You are correctly enrolled on your programme of study (including re-enrolment for each academic year after initial enrolment).
- ii) You read and understand the information provided about how you will be assessed, how your final award will be determined, and the action to take in the event that you experience difficulties relating to assessment.
- iii) You attempt every assessment component of a module.
- iv) You attend examinations and other assessment events, including re-examination and re-assessment events, as required; and that you are available to attend oral examinations if required to do so within the published dates of terms or semesters, or other date notified to you in advance.
- v) You submit work for assessment as required and in accordance with the required format and deadline.
- vi) You inform your Programme Manager or Student Services of any disability or long-term impairment which might require special provisions for assessment.
- vii) You familiarise yourself with the University's definition of academic misconduct and undertake assessments in a manner that does not attempt to gain unfair advantage.
- viii) You follow the prescribed procedures in the event that you experience extenuating circumstances or wish to appeal against the decision of an Examining Board.
- ix) You keep a copy of work presented for assessment wherever feasible.
- x) You make your work available for sampling for external examining purposes.

VIRTUAL LEARNING ENVIRONMENT (VLE)

Moodle is the University's Virtual Learning Environment (VLE). The VLE is used to support learning and teaching. It can be accessed by **enrolled** students from anywhere in the world using the internet and a web browser.

Some of Moodle's features allow students to:

- Access course materials
- Facilitate communication between students and tutors - this may also take place via Microsoft Teams
- Support group tasks
- Take online assessments with automatic marking and feedback facilities

Moodle can be used for administration tasks such as:

- Displaying announcements e.g. lecture venue changed
- Submission of assignments electronically
- Administration of online surveys, such as module questionnaires

How to Access:

You can access Moodle in 3 different ways:

1. From Hwb - Access your Hwb dashboard either by logging into a campus PC and opening Internet Explorer, or accessing <https://hwb.uwtsd.ac.uk> from any browser on an internet-connected device. Click on the Moodle tile.
2. From the University Website - navigate to <http://uwtsd.ac.uk> and select Quick Links (top left side of screen) and then Moodle.
3. URL Input - Open any browser on an internet-connected device and navigate to <http://moodle.uwtsd.ac.uk>

If you are already signed into the Hwb or Office 365 you should be automatically signed into Moodle when you connect, if not log in using your Network username and password which are the same as used to access a campus PC.

If you are missing courses/modules in the **My Courses** block please contact your **lecturers** to ask if they use Moodle. Please note it can take 24hrs for enrolment data to feed into Moodle. If you have problems finding resources (timetables, lecture notes, assignment briefs etc.) please contact the **lecturer** that delivers the course/module.

For any technical issues or error messages contact the **IT Service Desk** via:

Web: <https://webhelp.uwtsd.ac.uk>

Tel: 0300 500 5055

Or email: ITServiceDesk@uwtsd.ac.uk

In any correspondence please include your name and username (your student number) together with details of your issue.

Further information on using online and digital resources can be found at <https://digitallearning.uwtsd.ac.uk/>

ASSESSMENT FEEDBACK VIA TURNITIN

For feedback provided through Turnitin, there are two areas to get your feedback: written feedback, and the marking rubric.

Written feedback will comment on the overall work.

The marking rubric will focus on how the piece of work meets the criteria listed in the relevant rubric.

The marking rubric does not give a mathematically calculated result based on the sum of individual components but is used holistically to help determine the mark.

Written Feedback and the Marking Rubric can be found by clicking the buttons as shown when you view your submitted assignment in Turnitin.

PROGRAMMES OF STUDY

(1) BSc Architectural Technology

The programme has the following general educational and specific aims:

- To develop the knowledge, skills and competence necessary to successfully practice in the fields of Architectural Technology
- To enhance analytical, decision-making, problem-solving skills and powers of critical judgement
- To develop the abilities and qualities necessary for effective graphical, oral and written communication, using Information Technology and teamwork where appropriate
- To provide students with an insight and understanding of their own roles and the roles of others in the building team through interdisciplinary studies
- To engender a spirit of enquiry and recognition of the importance of the quality of the Built Environment to present and future generations who live and work in it
- To prepare students for careers in the Private, Public and Voluntary sectors

Programme Learning Outcomes

On completion of BSc Architectural Technology, students will have achieved the following programme learning outcomes:

Knowledge and understanding (KU)

- KU1: History and context, design of buildings including new buildings and alteration, extension and conservation of existing buildings.
- KU2: Factors used to establish the fundamental link between design and the technological, environmental, cultural, economic and social parameters.
- KU3: Computer-aided design, three-dimensional modelling, information and communication technology and building information modelling, new and emerging technologies, processes, modelling, knowledge management, information management, enterprise and infrastructure architecture
- KU4: Building services, materials, environmental science and structural engineering related to design for production and performance
- KU5: Design and construction process and systems efficiency, effectiveness, economic environmental sustainability and environmental impact, user and market needs, cost, quality, environmental impact, safety, reliability, appearance, fitness for purpose including accessibility and inclusive design, life cycle, maintenance and refurbishment.
- KU6: Design related to architectural technology as the technology of architecture ontologies, forms, functions, concepts and contexts.

Each of the above PLOs is covered by at least two modules at the appropriate level (taking into account individual patterns of study)

Cognitive (thinking) skills (CS)

- CS1: Select and apply built environment methods associated with the architectural processes.
- CS2: Consider general principles of architectural theory in the resolution of practical problems and in the modelling and analysis of systems and processes.
- CS3: Create, analyse and assess systems, processes and components that require solutions in order to meet specific needs within architectural technology.
- CS4: Comment on financial considerations and administer budgets
- CS5: Identify and promote the introduction of new and emerging technologies in order to improve the planning, construction and facilities management process.
- CS6: Problem solve to realise the design into built form through the generation of detailed design solutions that respond to familiar and unfamiliar situations.
- CS7: Work independently and as a member of a team developing critical discussion and analysis of complex concepts, identifying personal development needs and to plan to meet these needs through relevant and appropriate methods

Each of the above PLOs is covered by at least two modules at the appropriate level (taking into account individual patterns of study)

Practical skills (PS)

- PS1: Produce creative design solutions utilising high-quality architectural 2D or 3D presentations, artefacts and parametric models through the application of various methodologies
- PS2: Establish client requirements and user factors; identify challenges and preferences in order to develop the design brief and formulate proposals that respond to the brief
- PS3: Apply legal and regulatory requirements to achieve inclusive and sustainable buildings using building regulations, health and safety, quality assurance and control systems
- PS4: Present architectural technology information and articulate arguments clearly and correctly, in an appropriate format to a range of audiences
- PS5: Evaluate and realise the design into built form through the generation of detailed technical solutions that respond to complex and unfamiliar situations
- PS6: Use and propose diagnostic methods in the identification of structural elements and the general condition, evaluation of building survey information and assessing a building scope when considering refurbishment or other work
- PS7: Apply technical and performance requirements and methods for specifying materials and components including implementation of manufacturers' literature, design and technical guides, material certification
- PS8: Apply project and design management, project procurement and process, construction and contract management

Each of the above PLOs is covered by at least two modules at the appropriate level (taking into account individual patterns of study)

Key skills (KS)

- KS1: Select, analyse, present information and data sources rigorously and coherently, and use appropriate information and communications technologies in different areas of their work.

- KS2: Classify and critically reflect on the knowledge and skills they have accumulated, relating them to the requirements of architectural technology.
- KS3: Learn, study and implement research independently, and be able to make valued judgements. Draw reflective conclusions and present the results in a professional format.
- KS4: Display skills in evaluating and interpreting, in a balanced manner, new information provided by others from a range of fields of study.
- KS5: Communicate effectively on different subject areas in a variety of built and associated professional contexts using the different means and resources available.
- KS6: Apply the principles of interdisciplinary teamwork including sharing, delegating and accepting different responsibilities and offering and accepting opinions to and from other members.
- KS7: Assess the ethical, equality and inclusion consequences of human activities to optimise community and environmental sustainability within the industry.
- KS8: Building performance appraisal, investigation, diagnostics and non-destructive testing including the ongoing processes of evaluation, development, redevelopment and maintenance and the solution of related multifaceted problems and reliability engineering.

Each of the above PLOs is covered by at least two modules at the appropriate level (taking into account individual patterns of study).

Level 6

All Level 6 students must normally pursue 120 credits at Level 6. The credit rating of each module is specified in the module details.

PROGRAMME STRUCTURE

Full-time Students

Module Code	Title	Module type (component pass, core, compulsory or optional)	Credits
Year 3	Level 6	Semester 1 & 2	Sep to May
ACBA6008	Independent Project	Compulsory	40
M6X01984	Architecture Studio 3B	Compulsory	20
ACBA6003	Integrated Group Project	Compulsory	20
M6X01985	Architecture Studio 3C	Compulsory	20
ACBA6005	Advanced Building Services and Environmental Design	Compulsory	20

Part-time Students

Module Code	Title	Module type (component pass, core, compulsory or optional)	Credits
Year 4	Level 6	Semester 1 & 2	Sep to May
ACBA6005	Advanced Building Services and Environmental Design	Compulsory	20
M6X01985	Architecture Studio 3C	Compulsory	20
M6X01984	Architecture Studio 3B	Compulsory	20
Year 5	Level 6	Semester 1 & 2	Sep to May
ACBA6003	Integrated Group Project	Compulsory	20
ACBA6008	Independent Project	Compulsory	40

(2) BSc Building Surveying

The programme has the following general educational and specific aims:

- To foster knowledge of the principles of building construction technology, including developing technology
- To develop an appreciation of management techniques encompassing value management, risk management, quality management, health and safety management, and time and programme management
- To provide an appreciation of property and infrastructure development in relation to financial and legal aspects, together with a comprehension of the inter-relationship of the time, cost, quality and health and safety issues
- To gain knowledge of property and construction across a range of construction outputs and an awareness and practical ability to work on preventative measures to keep buildings in good, sustainable working order
- To become familiar with the legal requirements of construction such as building regulations and construction design and management compliance
- To gain appropriate knowledge for instructing on the preservation/conservation of historic buildings, advising on the management and supervision of maintenance of buildings and dealing with planning applications and advising on property legislation and building regulation.

Programme Learning Outcomes

On completion of BSc Building Surveying, students will have achieved the following programme learning outcomes:

Knowledge and understanding (KU)

- KU1: Construction industry methods appropriate for application to site and administrative work.
- KU2: Aspects of construction appropriate to the multi-disciplines within the construction industry.
- KU3: Integrate the relationship between theory, experiment, investigation and fieldwork to site work.
- KU4: General and fundamental characteristics of construction industry materials and components, their properties, applications and costs.
- KU5: Global, regional and local contextualisation of required practices and operations.
- KU6: Award-specific and generic skills including problem definition and resolution and a professional approach to study and lifelong learning.

Each of the above PLOs is covered by at least two modules at the appropriate level (taking into account individual patterns of study).

Cognitive (thinking) skills (CS)

- CS1: Select built environment methods associated with the construction processes found in maintenance and management.
- CS2: Consider general principles of construction theory in the resolution of practical problems and in the modelling and analysis of systems and processes.
- CS3: Select building management tools and computer-based methods for modelling and evaluating construction site problems and solutions.
- CS4: Create, analyse and assess systems, processes and components that require solutions in order to meet specific needs within the built environment.
- CS5: Comment and review financial considerations and administer budgets
- CS6: Understand the economic risks and opportunities within the building industry.
- CS7: Identify and promote the introduction of new and emerging technologies in order to improve the planning, construction and facilities management process.

Each of the above PLOs is covered by at least two modules at the appropriate level (taking into account individual patterns of study).

Practical skills (PS)

- PS1: Plan, conduct and report on site investigations, including those using secondary data.
- PS2: Use proper equipment to design and develop practical lab exercises and simulations to generate data that could be analysed, assessed and applied to specific situations.
- PS3: Collect, record and interpret diverse types of information generated by a wide range of methods and summarise it using appropriate qualitative and/or quantitative techniques.
- PS4: Carry out research in order to develop ideas further, being able to synthesise information and draw conclusions applicable to practical situations.
- PS5: Suggest, plan and manage professional site management projects according to requirement, considering economic personnel and time constraints.
- PS6: Accurately note safety regulations, legal requirements including those relating to equality and inclusion, and the impact of investigations on the working environment.
- PS7: Create, manage and train teams of workers according to the needs of their department, optimising knowledge and skills bases at every level.
- PS8: Use and apply the appropriate IT tools that help to communicate and manage the built environment.

Each of the above PLOs is covered by at least two modules at the appropriate level (taking into account individual patterns of study).

Key skills (KS)

- KS1: Select and present information and data sources coherently and use appropriate information and communications technologies in different areas of their work.
- KS2: Identify the knowledge and skills they have accumulated, relating them to the requirements of the construction industry.
- KS3: Learn, study and implement research independently but within a closely supervised environment, and be able to make partial judgements, draw conclusions and present the results in an adequate format.

- KS4: Display skills in interpreting, in a balanced manner, new information provided by others from a range of fields of study. (4.6(vi))
- KS5: Communicate effectively on different subject areas in a variety of built and associated professional contexts using the different means and resources available.
- KS6: Apply the principles of interdisciplinary teamwork including, sharing, delegating and accepting different responsibilities and offering and accepting opinions to and from other members.
- KS7: Assess the ethical, equality and inclusion consequences of human activities to optimise community and environmental sustainability within the industry.
- KS8: Plan and execute research or development work, evaluate the outcomes, draw valid conclusions and make recommendations

Each of the above PLOs is covered by at least two modules at the appropriate level (taking into account individual patterns of study).

Level 6

All Level 6 students must normally pursue 120 credits at Level 6. The credit rating of each module is specified in the module details.

PROGRAMME STRUCTURE

Full-time Students

Module Code	Title	Module type (component pass, core, compulsory or optional)	Credits
Year 3	Level 6	Semester 1 & 2	Sep to May
ACBA6008	Independent Project	Compulsory	40
ACBA6003	Integrated Group Project	Compulsory	20
ACBA6004	Advanced Construction and Civil Engineering Technology	Compulsory	20
ACBA6005	Advanced Building Services and Environmental Design	Compulsory	20
ACBA6001	Design Economics	Optional	20
ACBA6006	Building Conservation, Asset & Facilities Management	Optional	20

Part-time Students

Module Code	Title	Module type (component pass, core, compulsory or optional)	Credits
Year 4	Level 6	Semester 1 & 2	Sep to May
ACBA6004	Advanced Construction and Civil Engineering Technology	Compulsory	20
ACBA6005	Advanced Building Services and Environmental Design	Compulsory	20
ACBA6001	Design Economics	Optional	20

ACBA6003	Integrated Group Project	Compulsory	20
ACBA6008	Independent Project	Compulsory	40

(3) BSc Civil Engineering

The BSc (Hons) in Civil Engineering at University of Wales Trinity Saint David aims to offer the students a programme of study, leading to the award of a degree in Civil Engineering that will equip the students with the fundamental theories, essential knowledge and requisite skills needed to practice broadly as a civil engineer within the built environment. The program will also allow the pursuance of specific careers in site practices, design offices, management or in research and academia.

The programme has the following general educational and specific aims:

- To provide knowledge of the fundamental engineering principles on which the built environment is based
- To provide knowledge on application of established analytical and design techniques required by the construction processes, as well as for problem solving and decision making
- To foster organisational and planning skills in civil engineering projects, considering impact implications on environment and on future generations
- To develop surveying skills required for measurement, construction inspection and site layout
- To create an insight to structural analysis and capacity to design basic elements
- To develop the ability to use and interpret commercial software packages that simulate engineering processes and facilitates a holistic approach to the running of the construction projects from idea to completion
- To develop the ability to undertake a sustained research project in relation to their degree award and to present their findings.

Programme Learning Outcomes

On completion of BSc Civil Engineering, students will have achieved the following programme learning outcomes:

Knowledge and understanding (KU)

- KU1: Construction industry methods appropriate for application to site and administrative work.
- KU2: Aspects of construction appropriate to the multi-disciplines within the construction industry.
- KU3: Integrate the relationship between theory, experiment, investigation and fieldwork to site work.
- KU4: General and fundamental characteristics of construction industry materials and components, their properties, applications and costs.
- KU5: Global, regional and local contextualisation of required practices and operations.
- KU6: Award-specific and generic skills including problem definition and resolution and a professional approach to study and lifelong learning.

Each of the above PLOs is covered by at least two modules at the appropriate level (taking into account individual patterns of study).

Cognitive (thinking) skills (CS)

- CS1: Select built environment methods associated with the construction processes found in maintenance and management.
- CS2: Consider general principles of construction theory in the resolution of practical problems and in the modelling and analysis of systems and processes.
- CS3: Select building management tools and computer-based methods for modelling and evaluating construction site problems and solutions.
- CS4: Create, analyse and assess systems, processes and components that require solutions in order to meet specific needs within the built environment.
- CS5: Comment and review financial considerations and administer budgets
- CS6: Understand the economic risks and opportunities within the building industry.
- CS7: Identify and promote the introduction of new and emerging technologies in order to improve the planning, construction and facilities management process.

Each of the above PLOs is covered by at least two modules at the appropriate level (taking into account individual patterns of study).

Practical skills (PS)

- PS1: Plan, conduct and report on site investigations, including those using secondary data.
- PS2: Use proper equipment to design and develop practical lab exercises and simulations to generate data that could be analysed, assessed and applied to specific situations.
- PS3: Collect, record and interpret diverse types of information generated by a wide range of methods and summarise it using appropriate qualitative and/or quantitative techniques.
- PS4: Carry out research in order to develop ideas further, being able to synthesise information and draw conclusions applicable to practical situations.
- PS5: Suggest, plan and manage professional site management projects according to requirement, considering economic, personnel and time constraints.
- PS6: Accurately note safety regulations, legal requirements including those relating to equality and inclusion, and the impact of investigations on the working environment.
- PS7: Create, manage and train teams of workers according to the needs of their department, optimising knowledge and skills bases at every level.
- PS8: Use and apply the appropriate IT tools that help to communicate and manage the built environment.

Each of the above PLOs is covered by at least two modules at the appropriate level (taking into account individual patterns of study).

Key skills (KS)

- KS1: Select and present information and data sources coherently and use appropriate information and communications technologies in different areas of their work.

- KS2: Identify their knowledge and skills they have accumulated, relating them to the requirements of the construction industry.
- KS3: Learn, study and implement research independently but within a closely supervised environment, and be able to make partial judgements, draw conclusions and present the results in an adequate format.
- KS4: Display skills in interpreting, in a balanced manner, new information provided by others from a range of fields of study.
- KS5: Communicate effectively on different subject areas in a variety of built and associated professional contexts using the different means and resources available.
- KS6: Apply the principles of interdisciplinary teamwork including, sharing, delegating and accepting different responsibilities and offering and accepting opinions to and from other members.
- KS7: Assess the ethical, equality and inclusion consequences of human activities to optimise community and environmental sustainability within the industry.
- KS8: Plan and execute research or development work, evaluate the outcomes, draw valid conclusions and make recommendations

Each of the above PLOs is covered by at least two modules at the appropriate level (taking into account individual patterns of study).

Level 6

All Level 6 students must normally pursue 120 credits at Level 6. The credit rating of each module is specified in the module details.

PROGRAMME STRUCTURE

Full-time Students

Module Code	Title	Module type (component pass, core, compulsory or optional)	Credits
Year 3	Level 6	Semester 1 & 2	Sep to May
ACBA6008	Independent Project	Compulsory	40
ACBA6000	Construction Management	Compulsory	20
ACBA6003	Integrated Group Project	Compulsory	20
ACBA6004	Advanced Construction and Civil Engineering Technology	Compulsory	20
ACBA6007	Structural Design	Compulsory	20

Part-time Students

Module Code	Title	Module type (component pass, core, compulsory or optional)	Credits
Year 4	Level 6	Semester 1 & 2	Sep to May
ACBA6004	Advanced Construction and Civil Engineering Technology	Compulsory	20
ACBA6000	Construction Management	Compulsory	20
ACBA6007	Structural Design	Compulsory	20
Year 5	Level 6	Semester 1 & 2	Sep to May
ACBA6003	Integrated Group Project	Compulsory	20
ACBA6008	Independent Project	Compulsory	40

(4) BSc Construction Management

The primary aim is to provide students with a programme of study directed towards the construction industry that will equip students with the essential knowledge and skills to pursue careers as professional technical managers in construction management.

The programme has the following general educational and specific aims:

- A knowledge of the principles of building construction technology, including developing technology
- An appreciation of construction management as a management technique encompassing risk, cost, quality, health and safety, and time and programme management
- The ability to utilise certain commercial software packages in the management of the time and cost components of a project
- An understanding of the inter-personal skills necessary to be an effective construction manager
- An in-depth analysis of the financial and economic factors to be considered in obtaining the optimum solution to a particular project
- Ability to undertake a sustained research project in relating to their award and to present their findings

Programme Learning Outcomes

On completion of BSc Construction Management., students will have achieved the following programme learning outcomes:

Knowledge and understanding (KU)

- KU1: Construction industry methods appropriate for application to site and administrative work.
- KU2: Aspects of construction appropriate to the multi-disciplines within the construction industry.
- KU3: Integrate the relationship between theory, experiment, investigation and fieldwork to site work.
- KU4: General and fundamental characteristics of construction industry materials and components, their properties, applications and costs.
- KU5: Global, regional and local contextualisation of required practices and operations
- KU6: Award-specific and generic skills including problem definition and resolution and a professional approach to study and lifelong learning.

Each of the above PLOs is covered by at least two modules at the appropriate level (taking into account individual patterns of study).

Cognitive (thinking) skills (CS)

- CS1: Select built environment methods associated with the construction processes found in maintenance and management.
- CS2: Consider general principles of construction theory in the resolution of practical problems and in the modelling and analysis of systems and processes.
- CS3: Select building management tools and computer-based methods for modelling and evaluating construction site problems and solutions.
- CS4: Create, analyse and assess systems, processes and components that require solutions in order to meet specific needs within the built environment.
- CS5: Comment and review financial considerations and administer budgets
- CS6: Understand the economic risks and opportunities within the building industry.
- CS7: Identify and promote the introduction of new and emerging technologies in order to improve the planning, construction and facilities management process

Each of the above PLOs is covered by at least two modules at the appropriate level (taking into account individual patterns of study).

Practical skills (PS)

- PS1: Plan, conduct and report on site investigations, including those using secondary data.
- PS2: Use proper equipment to design and develop practical lab exercises and simulations to generate data that could be analysed, assessed and applied to specific situations.
- PS3: Collect, record and interpret diverse types of information generated by a wide range of methods and summarise it using appropriate qualitative and/or quantitative techniques.
- PS4: Carry out research in order to develop ideas further, being able to synthesise information and draw conclusions applicable to practical situations.
- PS5: Suggest, plan and manage professional site management projects according to requirement, considering economic personnel and time constraints.
- PS6: Accurately note safety regulations, legal requirements including those relating to equality and inclusion, and the impact of investigations on the working environment.
- PS7: Create, manage and train teams of workers according to the needs of their department, optimising knowledge and skills bases at every level.
- PS8: Use and apply the appropriate IT tools that help to communicate and manage the built environment.

Each of the above PLOs is covered by at least two modules at the appropriate level (taking into account individual patterns of study).

Key skills (KS)

- KS1: Select and present information and data sources coherently and use appropriate information and communications technologies in different areas of their work.
- KS2: Identify their knowledge and skills they have accumulated, relating them to the requirements of the construction industry.
- KS3: Learn, study and implement research independently but within a closely supervised environment, and be able to make partial judgements, draw conclusions and present the results in an adequate format.

- KS4: Display skills in interpreting, in a balanced manner, new information provided by others from a range of fields of study.
- KS5: Communicate effectively on different subject areas in a variety of built and associated professional contexts using the different means and resources available.
- KS6: Apply the principles of interdisciplinary teamwork including, sharing, delegating and accepting different responsibilities and offering and accepting opinions to and from other members.
- KS7: Assess the ethical, equality and inclusion consequences of human activities to optimise community and environmental sustainability within the industry.
- KS8: Plan and execute research or development work, evaluate the outcomes, draw valid conclusions and make recommendations

Each of the above PLOs is covered by at least two modules at the appropriate level (taking into account individual patterns of study).

Level 6

All Level 6 students must normally pursue 120 credits at Level 6. The credit rating of each module is specified in the module details.

Year 4	Level 6	Semester 1 & 2	Sep to May
ACBA6004	Advanced Construction and Civil Engineering Technology	Compulsory	20
ACBA6000	Construction Management	Compulsory	20
ACBA6006	Building Conservation, Asset & Facilities Management	Compulsory	20
Year 5	Level 6	Semester 1 & 2	Sep to May
ACBA6008	Independent Project	Compulsory	20
ACBB6002	Individual Research Project	Compulsory	40

(5) BSc Quantity Surveying

The programme has the following general educational and specific aims:

- To develop the knowledge, skills and competence necessary to successfully practice in the fields of Quantity Surveying
- To enhance analytical, decision-making, problem-solving skills and powers of critical judgement
- To develop the abilities and qualities necessary for effective graphical, oral and written communication, using Information Technology and teamwork where appropriate
- To provide students with an insight and understanding of their own roles and the roles of others in the building team through interdisciplinary studies
- To engender a spirit of enquiry and recognition of the importance of the quality of the Built Environment to present and future generations who live and work in it
- To prepare students for careers in both the Private, Public and Voluntary sectors.

Programme Learning Outcomes

On completion of BSc Quantity Surveying, students will have achieved the following programme learning outcomes:

Knowledge and understanding (KU)

- KU1: Construction industry methods appropriate for application to site and administrative work.
- KU2: Aspects of construction appropriate to the multi-disciplines within the construction industry.
- KU3: Integrate the relationship between theory, experiment, investigation and fieldwork to site work.
- KU4: General and fundamental characteristics of construction industry materials and components, their properties, applications and costs.
- KU5: Global, regional and local contextualisation of required practices and operations.
- KU6: Award-specific and generic skills including problem definition and resolution and a professional approach to study and lifelong learning.

Each of the above PLOs is covered by at least two modules at the appropriate level (taking into account individual patterns of study).

Cognitive (thinking) skills (CS)

- CS1: Select built environment methods associated with the construction processes found in maintenance and management.
- CS2: Consider general principles of construction theory in the resolution of practical problems and in the modelling and analysis of systems and processes.

- CS3: Select building management tools and computer-based methods for modelling and evaluating construction site problems and solutions.
- CS4: Create, analyse and assess systems, processes and components that require solutions in order to meet specific needs within the built environment.
- CS5: Comment and review financial considerations and administer budgets
- CS6: Understand the economic risks and opportunities within the building industry.
- CS7: Identify and promote the introduction of new and emerging technologies in order to improve the planning, construction and facilities management process.

Each of the above PLOs is covered by at least two modules at the appropriate level (taking into account individual patterns of study).

Practical skills (PS)

- PS1: Plan, conduct and report on site investigations, including those using secondary data.
- PS2: Use proper equipment to design and develop practical lab exercises and simulations to generate data that could be analysed, assessed and applied to specific situations.
- PS3: Collect, record and interpret diverse types of information generated by a wide range of methods and summarise it using appropriate qualitative and/or quantitative techniques.
- PS4: Carry out research in order to develop ideas further, being able to synthesise information and draw conclusions applicable to practical situations.
- PS5: Suggest, plan and manage professional site management projects according to requirement, considering economic personnel and time constraints.
- PS6: Accurately note safety regulations, legal requirements including those relating to equality and inclusion, and the impact of investigations on the working environment.
- PS7: Create, manage and train teams of workers according to the needs of their department, optimising knowledge and skills bases at every level.
- PS8: Use and apply the appropriate IT tools that help to communicate and manage the built environment.

Each of the above PLOs is covered by at least two modules at the appropriate level (taking into account individual patterns of study).

Key skills (KS)

- KS1: Select and present information and data sources coherently and use appropriate information and communications technologies in different areas of their work.
- KS2: Identify their knowledge and skills they have accumulated, relating them to the requirements of the construction industry.

ACBA6003	Integrated Group Project	Compulsory	20
ACBA6008	Independent Project	Compulsory	40

Where appropriate, the University may allow students to study modules in addition to the 120 credits studied for the level of study e.g. Welsh medium or IT modules. Students would need to discuss this with their Programme Manager.

Note that on Programmes of Study offering a large number of options, timetable constraints will inevitably mean that not all combinations of options will be possible.

Module details are correct on 1 September 2021, and will not normally be changed during the year. In the unlikely event of changes having to be made to these details during the year, you will be notified in writing. Module descriptors are presented in the accompanying Module Directory document.

UNIVERSITY ATTENDANCE POLICY

Attendance is an important indicator of your engagement with and success in your studies. All students are therefore required to attend all scheduled classes and tutorials and Institutes will record individual academic attendance. It is important that:

- you familiarise yourself with the attendance policy relevant to you (see <https://www.uwtsd.ac.uk/academic-office/other-forms-and-policies/>);

- you are fully aware of procedures to follow in case of unexpected absences;
- you are aware that disciplinary action will be taken for any sustained periods of unauthorised absence.

This is particularly important for **international students with a UKVI student Visa**. Failure to adhere to the requirements and conditions of the Attendance Policy will lead to withdrawal from your programme and the University will also inform the UKVI to withdraw your student visa sponsorship.

Appeal against withdrawal due to poor attendance – Information on how to appeal against withdrawal due to poor attendance is provided on the University's website (<http://www.uwtsd.ac.uk/academic-office/procedures-for-academic-appeals-complaints-and-other-student-cases/>).

CODES OF CONDUCT

The University is committed to providing all students with a safe and inclusive learning environment where all students have the potential to succeed to the best of their ability.

The University expects all students to abide by the Student Code of Conduct (see <https://www.uwtsd.ac.uk/studentcharter/>).

The University also has Support for Study and Fitness to Practise Policies (see <https://www.uwtsd.ac.uk/academic-office/academic-quality-handbook/>).

In addition, many programmes have a professional code of conduct that you are expected to adhere to. Your Programme Manager will provide you with appropriate details.

ABOUT ACADEMIC MISCONDUCT AND PLAGIARISM

The University defines academic misconduct as 'any act, intentional or otherwise, whereby a person may obtain for himself/herself or for another, an unpermitted advantage...'. Committing academic misconduct in assessment is one of the most serious offences in academic life, and its consequences can be severe. It undermines the integrity of scholarship, research, and of the examination and assessment process.

It is very important to understand that it is no defence to claim that academic misconduct has been committed unintentionally, accidentally, due to extenuating circumstances or a long-term impairment (irrespective of whether or not these circumstances or long-term impairment have been acknowledged by the University).

Plagiarism is one type of academic misconduct. Plagiarism is passing off, or attempting to pass off, another's work as your own. It includes copying the words, ideas, images or research results of another **without acknowledgement**, whether those words etc. are published or unpublished. It is plagiarism, for example, to copy the work of another student, of a member of staff or a published article without crediting the author. Persons who allow their work to be plagiarised are also guilty.

It should be noted that re-submitting work that has already been submitted for a different assessment task without noting that this is the case is also regarded as plagiarism (and is called self-plagiarism) and will be treated as such.

Plagiarism is one of the worst offences in academic life, and its consequences can be severe. It undermines the integrity of scholarship, research, and of the examination and assessment process. The guidance that follows explains what is meant by plagiarism, describes the University's regulations for dealing with it, and provides help in avoiding it.

When enrolling as a student at the University of Wales Trinity Saint David you have consented to your work being scrutinised both electronically and in person to check for cases of plagiarism. Normally, your work will be submitted electronically via Moodle.

For submissions outside of the Moodle platform, it is equally important that you reference your sources accurately. In some cases, you will be expected to submit both hard and electronic copies, which can be checked against the database of the UK Higher Education Plagiarism Detection Service. For handwritten, portfolio and process workbook submissions check with your module tutor if you are in any doubt about whether you have infringed the regulations. They are here to assist you; ensure that you take advantage of their expertise.

Plagiarism: Regulations, Procedure and Penalties

Full details of the University's procedures and penalties for dealing with issues of plagiarism can be found in Chapter 12 of the *Academic Quality Handbook* and the associated *Academic Misconduct Policy*, which can be seen on the University website or obtained from the Institute Offices.

<https://www.uwtsd.ac.uk/academic-office/academic-quality-handbook/>

Avoiding Plagiarism

Coursework, dissertations, or creative work are meant to be your own original work. Obviously, you will use the work of others. Not only is this inevitable, it is expected. All scholarship builds on the work of others. The important thing to remember is always to **acknowledge your sources**. The University recognises four referencing styles: APA, Harvard, IEEE and MHRA and provides a handbook for each of these styles. For all programmes of study, you should be using Harvard. The handbooks can be found online: <https://www.uwtsd.ac.uk/library/infoskills/referencing-handbooks/> or in print from the Library and Learning Resources. A Referencing Essentials session will be provided during the first term of your first year but as a general rule of thumb observe the following:

- *Anything that is copied or quoted from another source, including electronic sources such as the internet, must be in quotation marks and attributed to the original author. This may be in the body of the text or as a footnote, depending on which Referencing style you are asked to use.*
- *Paraphrasing or summarising the work of others involves putting their ideas into your words. This is fine, but again, acknowledge your source.*
- *Where you are generally indebted for your ideas to one or two main sources, this can be a bit trickier. If the ideas or the way they are presented come from one or two sources, make this clear. Do the same if they come from lectures. It is important not to claim originality where it does not exist but to indicate in general where the information comes from.*
- *Full citations in timed unseen examinations are obviously not expected, but you should indicate general indebtedness and always credit any quotations you have managed to remember.*

The golden rule is; **'if in doubt, provide references'** and your Referencing Handbook will provide you with specific guidance to help you to do this correctly. For support, contact your tutor or Academic Liaison Librarian. There are no penalties for asking for advice and guidance; there are severe penalties for plagiarism and failure to reference means your work could be considered to be plagiarised.

Other types of Academic Misconduct

There are other types of academic misconduct, including, but not limited to producing work as a group where it is an individual task (called collusion), fabricating data or making false claims to have carried out research, using the service of an essay bank/essay mill, having an unauthorised source of information in an examination, prohibited communication during an examination. The same regulations, procedures and penalties apply to all types of academic misconduct.

LIBRARY AND LEARNING RESOURCES

Library and Learning Resources (LLR) supports the learning, teaching and research activities of staff and students across the University with library services available at Birmingham, Carmarthen, Lampeter, London and Swansea including online resources, social learning spaces, special collections and archives.

The library prioritises the purchase of e-books over print wherever possible and loan periods are regularly reviewed by the library to ensure that they are appropriate and provide equitable access to resources. It is expected that at least all Essential reading list items are available from the library. The LLR follows a Fairer Fines policy which means students are only fined on items if they are in heavy demand or requested by another library user.

The LLR provides a *Need More?* service which aims to provide a one stop shop for all learning resource needs, for example, if a book, journal or thesis is needed which is not in the library stock then it may be purchased or borrowed from another library. Further information can be found here: <https://uwtsd.ac.uk/library/need-more/>.

Learning Spaces

As well as collections, the library provides a variety of modern and flexible learning spaces, reflecting different styles of working e.g. group study spaces and quiet areas, as well as IT facilities, wireless internet, photocopying and printing facilities and excellent customer service.

Online Library

The LLR offers a wide range of printed and electronic resources including an extensive collection of online e-journals and e-books that are available 24/7 providing access to scholarly journals, newspapers, company reports and reference material. The library catalogue searches the whole range of print and online library materials and gives access to your library account from anywhere.

InfoSkills

All students are provided with a library tour, a Basic Skills session and a Referencing Essentials session in the first few weeks at the University. Academic Liaison Librarians will help students to develop the skills required to find, use and evaluate information sources within their subject areas. Numerous sessions are offered throughout the year to help students develop their Information Skills further to support their academic success and employability. These include sessions on identifying fake news, using statistics, Copyright awareness, and managing your online identity. The LLR operates

an open door policy which enables students to ask for help and advice on the information resources available throughout the academic year. Academic Liaison Librarians are welcomed to Staff / Student Committees, and also attend other relevant Institute meetings where invited, including the Institute Board. For further information on InfoSkills provision go to: <https://www.uwtsd.ac.uk/library/infoskills/>

Special Collections and Archives

The Library is also home to the Special Collections of UWTSD, including the University's oldest printed books, manuscripts and archives. The Special Collections include over 35,000 printed works, 8 medieval manuscripts, around 100 post medieval manuscripts, and 69 incunables. Material from the Archives includes the institutional archive of St David's College, later The University of Wales, Lampeter, and Trinity College Carmarthen, both constituent members of the University of Wales Trinity Saint David. Students are encouraged to use these wonderful resources as part of their studies, regardless of discipline. Visits and workshops are often arranged within the purpose-built reading rooms in the Lampeter campus library and there is a regular programme of exhibitions across the campuses and online.

For recent service developments, updates and contact information please visit the University Library website at <http://www.uwtsd.ac.uk/library/>. The latest updates on Covid related impact to services during 21/22 can be found here <https://uwtsd.ac.uk/library/help-and-support/covid-19-services/>. Please also follow the Library and Learning Resources on Facebook, Instagram or Twitter for up-to-date news, service developments and information on new services and resources: @UWTSDLib

STUDENT SERVICES

A professional support service providing high quality information, advice, guidance, practical and emotional support to enable all students to reach their full potential. Support available includes the Careers Service, Financial Support, Learning Support, Counselling Service and support for students from a care background. For further details see <http://www.uwtsd.ac.uk/student-services/>.

STUDY SKILLS

All students have access to study skills support to assist them in their studies. Details of provision are available from the Student Services offices on each campus and at <http://www.uwtsd.ac.uk/study-skills/>.

Topics covered include:

- Developing effective study strategies
- Planning and writing assignments
- Preparing presentations
- Planning for seminars
- Preparing for exams

Drop-in study skills sessions and 1:1 appointments are available online (and in person where possible) – no appointment necessary. Please see the Student Services study skills webpages for further details: <http://www.uwtsd.ac.uk/study-skills/>.

COMPLAINTS

You have a right to make a complaint about any specific concern about the provision of your Programme of Study or a related academic service. Full details of the complaints process can be found in the *Student Complaint Policy* associated with Chapter 12 of the Academic Quality Handbook and in supporting documentation published on the Academic Office section on the University's website:

<http://www.uwtsd.ac.uk/academic-office/procedures-for-academic-appeals-complaints-and-other-student-cases/>
