

Office Mix

Turn your existing Powerpoints into interactive online lessons

An easy, feature-packed way to start blending your teaching and learning.

Live slide annotation

Video and audio commentary

Interactive quizzes and polls

Learner analytics

Insert live web pages

Easy Moodle integration

5 reasons to use Office Mix...

1 IT'S STILL POWERPOINT

Office Mix is a simple add-on for Powerpoint. No new software to learn, just a few extra tools within Powerpoint's familiar interface.

2 USE YOUR EXISTING POWERPOINTS

There's no need to build a new bank of teaching resources from scratch. Office Mix works with existing Powerpoints so you don't need to go back to square one.

Just take your best teaching resources and make them even better!

3 GIVE YOUR PRESENTATIONS ADDED VALUE

Following a lecture, it's easy to upload your slides to Moodle for all students to access at their leisure, but the slides alone are only a small element of the learning experience - no explanation, no annotation and often no context.

Office Mix has several tools to enable you to make your online resource as rich a learning experience as the lecture itself. Alternatively, you could use the tools to create a shortened presentation focusing on the key or difficult topics with the additional content available to support learners in understanding these topics when, where and however many times they want.

Record your explanation, commentary and opinion using audio and/or video

Annotate the slide as you explain and elaborate on concepts

Insert live web pages, videos, screen captures and other rich media

4 MAKE IT INTERACTIVE!

Easily build quizzes, polls and surveys into your Powerpoint in order to:

- increase engagement
- reinforce understanding
- facilitate self-assessment

5 ASSESS AND ANALYSE

Detailed learner analytics allow you to track students' participation, understanding and performance for assessment for learning purposes.

You can use this information to make specific, targeted intervention or to identify course elements which the whole cohort are finding difficult and tailor your future teaching accordingly.
