

How to insert hyperlinks into a PowerPoint presentation.

Task 2 of 3 – Information Poster

1) Open your presentation in PowerPoint and go to slide where you want to add your hyperlink.

2) Highlight the text or select the object that you want to link from. Click the insert tab in the ribbon and select “Link”.

4) Enter the URL in the Address box if linking to a web page or select a location/document if your linking internally or to a new document, press ok.
