

Critical

Critical thinking means weighing up the argument and evidence for and against. This could include standing back and examining all the information, whilst closely analyzing if this is all true to its accord. Comparing views from other writers while being able to argue why someone's opinion is stronger than another. Also being wary of making sure not to just take statements at face value you should always investigate.

THINKING

Gibbs (1988)

"CRITICAL THINKING IS A DESIRE TO SEEK, PATIENCE TO DOUBT, FONDNESS TO MEDITATE, SLOWNESS TO ASSERT, READINESS TO CONSIDER, CAREFULNESS TO DISPOSE AND SET IN ORDER"
