

MARKING CRITERIA and STUDENT FEEDBACK

This section details the assessment criteria. The *extent* to which these are demonstrated by you determines your mark. The marks available for each criterion are shown. Lecturers will use the space provided to comment on the achievement of the task(s), including those areas in which you have performed well and areas that would benefit from development/improvement.

Common Assessment Criteria Applied	Marks Available	Marks Awarded
General Comments		
A clear practical section is not enhanced with a poorer research section that is limited in its content to what is requested. More depth in your observations would also have improved the report.	100	62
1. Engagement with Literature Skills		
You have researched the topics, listing many sources of information in your bibliography which you have referenced in your document. However more referencing of academic papers would have broadened your research.	20	12
2. Knowledge and Understanding Skills		
A clear explanation of the types of hypervisor, but while a choice of software has been made and justified no mention is made of alternative software. IP addressing is also basic with no more than an explanation but with no information on how data is moved over the network or the role of different devices. Testing is wholly missing.	12	8
3. Cognitive and Intellectual Skills		
You have included a lot of detail and information in making your choice but though you have made a choice more could have been included to back up this decision such as alternative software options.	15	5
4. Practical Application Skills		
You have set up the requested network of 4 machines. Each server has been given a name and an IP address. Connection has been confirmed with the PING command. You have also stated what you did for each screenshot and these have the correct data stamp but more depth is required for this. However in all machines you have incorrectly set the DNS server address and you have also not shown the assigning or naming of the network cards.	40	32
5. Transferable Skills for Life and Professional Practice		
You have produced a clear report that includes all sections requested. You have though some layout errors with not all sections starting on new pages.	10	5

Assignment Mark (Assessment marks are subject to ratification at the Exam Board. These comments and marks are to give feedback on module work and are for guidance only until they are confirmed.)
