Hey G, long time, how are you?

You remember that real Juno I put my hands on back in December? I've been jamming on it and I think I got a few ideas for an Ep. Would you help me out with one of em? It's instrumental electronic but I really wanna keep the analogue feel. I'm thinking Trent and Atticus meet the 80s and get over depression. Anyway, I've got two long tracks of Juno and BassStation played live, they're not in grid whatsoever but let's keep em that way, I'd need you to write other parts and add layers. Shall I send over what I've got?
