

MARKING CRITERIA and STUDENT FEEDBACK

This section details the assessment criteria. The *extent* to which these are demonstrated by you determines your mark. The marks available for each criterion are shown. Lecturers will use the space provided to comment on the achievement of the task(s), including those areas in which you have performed well and areas that would benefit from development/improvement.

Common Assessment Criteria Applied	Marks Available	Marks Awarded
1. Engagement with Literature Skills		
2. Knowledge and Understanding Skills		
Based on the assessment rubric - sample data entry + validation - no issues with your documentation. Various calculation for BMI etc - no issues with your documentation. The problem that exists in this section is due to "similar" elements of code within the website (this is documented in the rubric) - you cannot extend the calculations to a similar function	15	10
3. Cognitive and Intellectual Skills		
For what has been provided, you have a very good understanding of using js. However, due to your implementation of jquery element is somewhat problematic as it an extension of the various calculation and subsequently cannot be credited (see rubric)	15	10
4. Practical Application Skills		
Generally the site works well, validation for all elements is excellent - but should have demonstrated more "validation", having a simple contact form is fine, but not at this level. Elements that cover the various calculators is fine, but it is difficult to award the marks for the third component, if the jquery element was more distinct and was not "similar" to the calculator, marks could have been awarded. Irrespective of this you have full marks for the calculator either for the js or jquery implementation, but not both - this is documented in the rubric	70	42
5. Transferable Skills for Life and Professional Practice
