*under no circumstances
use this plaster for
life casting it gives off
a massive amount of heat
as it sets.*

fine casting

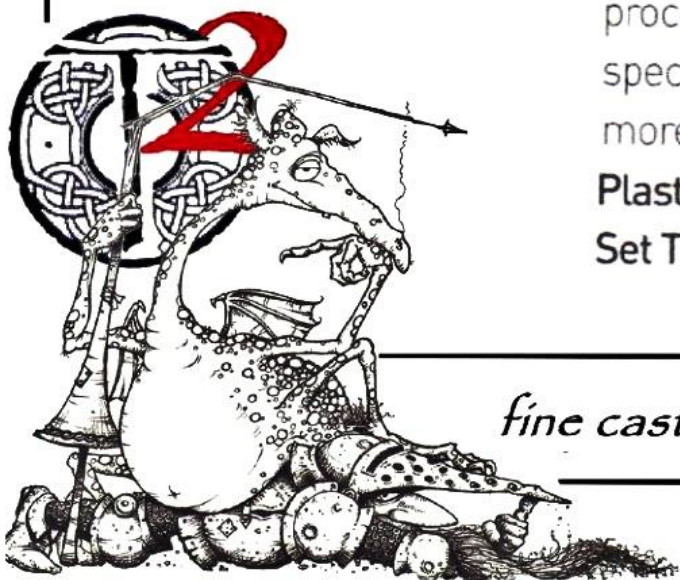

Fine Casting Plus Plaster

Similar to Fine Casting, but is processed to much tighter specifications, thereby producing more consistent material.

Plaster/Water Ratio: 100/70

Set Time (Mins): 20

fine casting plus

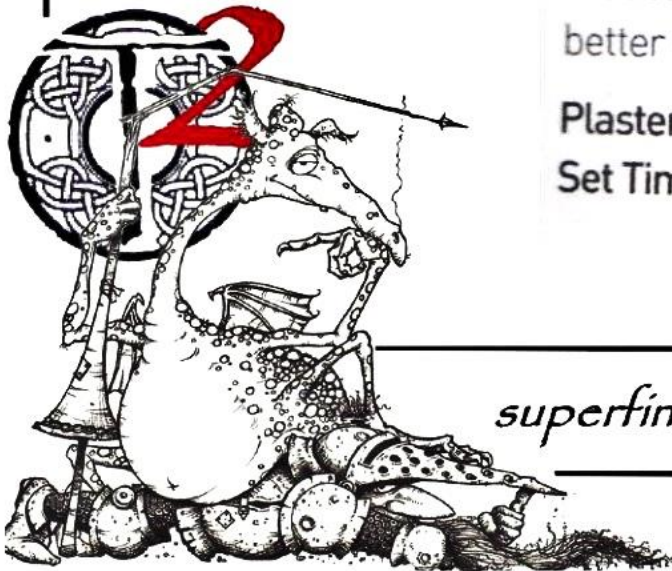

Superfine Casting Plaster

White plaster suitable for fibrous plasterwork, general casting, modelling applications. Harder and better quality than Fine Casting.

Plaster/Water Ratio: 100/70

Set Time (Mins): 22

superfine casting

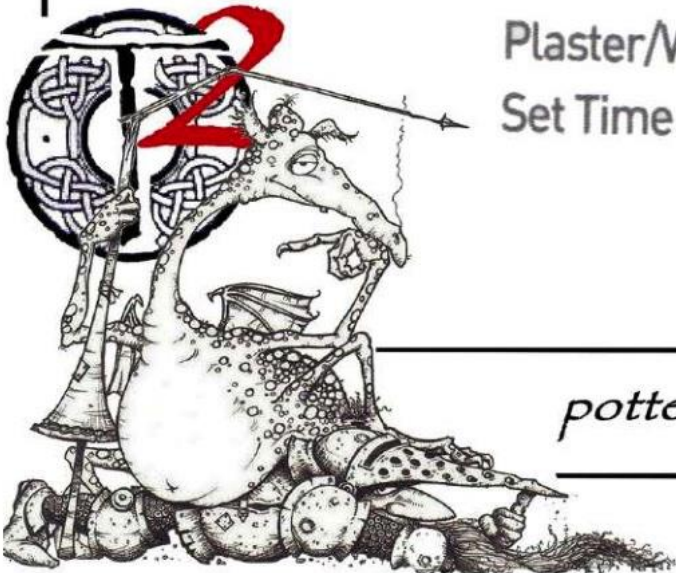

Pottery Plaster

Off white plaster suitable for castware, sanitaryware, jollied or hand pressed working moulds.

Plaster/Water Ratio: 100/69

Set Time (Mins): 9

pottery

this is the exact mid range plaster 50/50

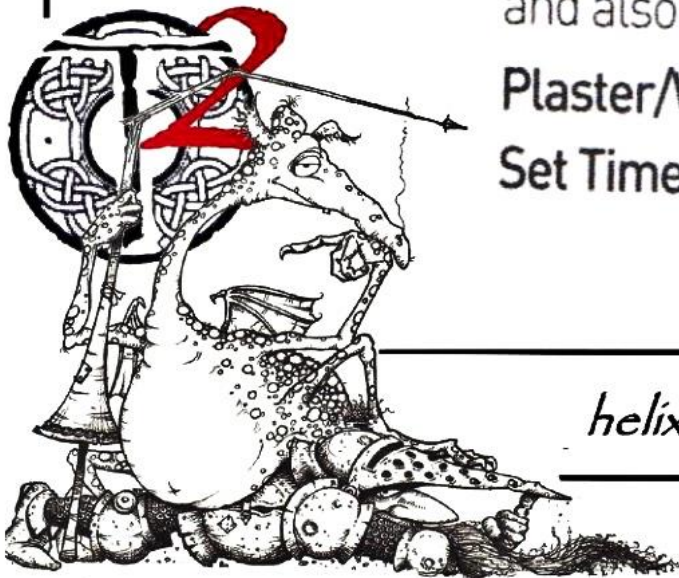

Helix Plaster

An off white plaster that combines good strength with low expansion. For production of reverse moulds, skirtings and column encasements, and also for GRG work.

Plaster/Water Ratio: 100/50

Set Time (Mins): 15

helix

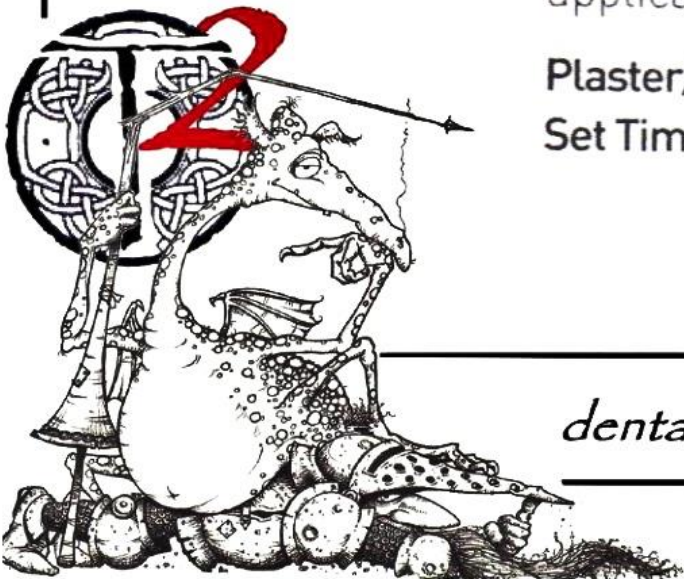

Dental Plaster

Primarily used for flasking in dental production, also used in other medical casting applications.

Plaster/Water Ratio: 100/60
Set Time (Mins): 11

dental

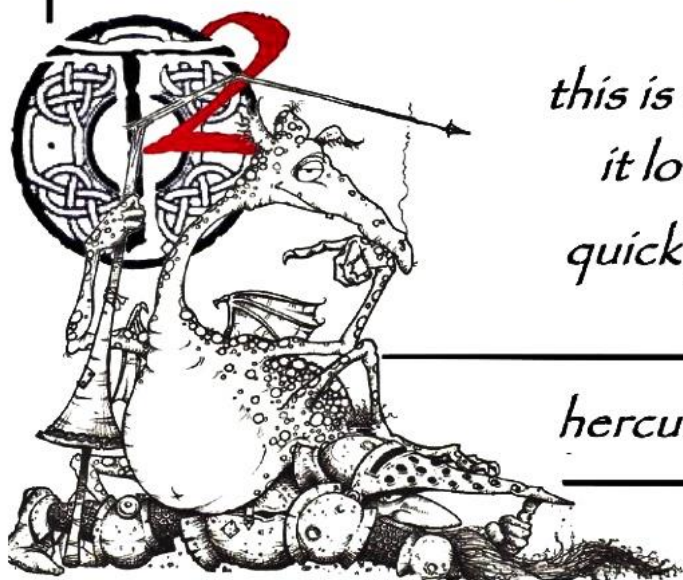

Herculite No. 2 Plaster

Hard white plaster for use where colour, high strength and surface durability are required. For fibrous plasterwork, GRG and giftware applications.

Plaster/Water Ratio: 100/42

Set Time (Mins): 10

this is an unusual plaster because it loses any moisture very quickly so great for grp moulds

herculite 2

Surgical Plaster

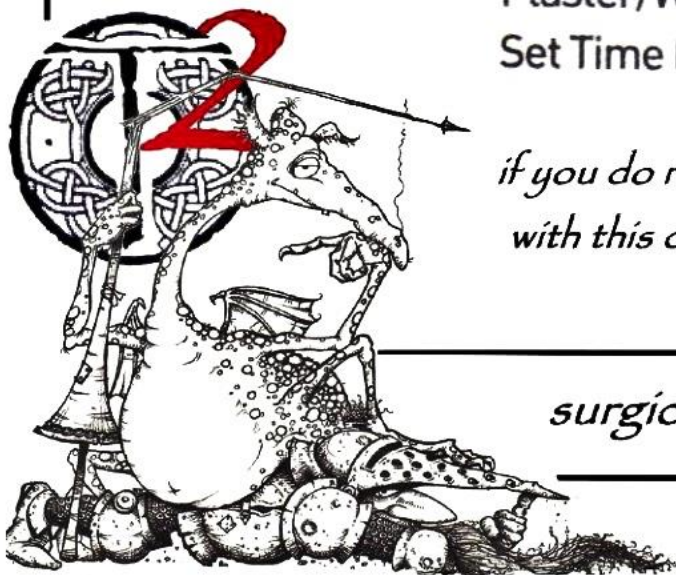

Used for high quality castings and models, also for specialised healthcare applications.

Plaster/Water Ratio: 100/60

Set Time (Mins): 11

*if you do not have modroc this is the plaster you use
with this cotton scrim*

surgical

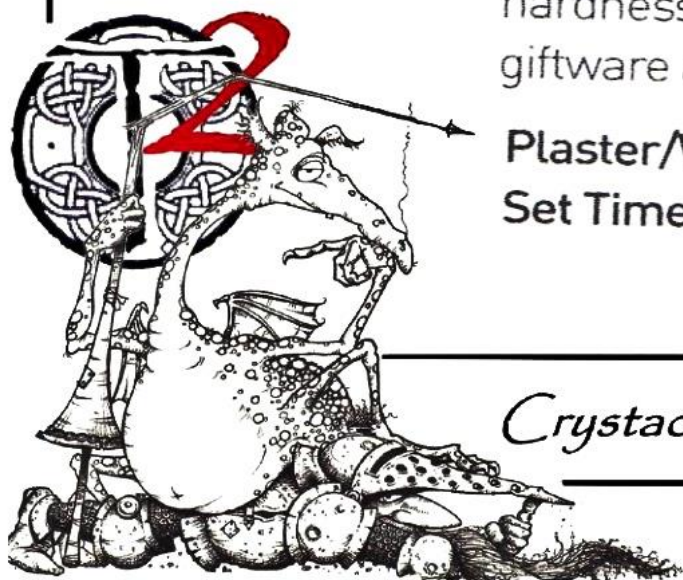

Crystacal R Plaster

An extra hard white plaster for use where high strength and surface hardness are important in GRG giftware and modelling applications.

Plaster/Water Ratio: 100/35
Set Time (Mins): 15

Crystacal R

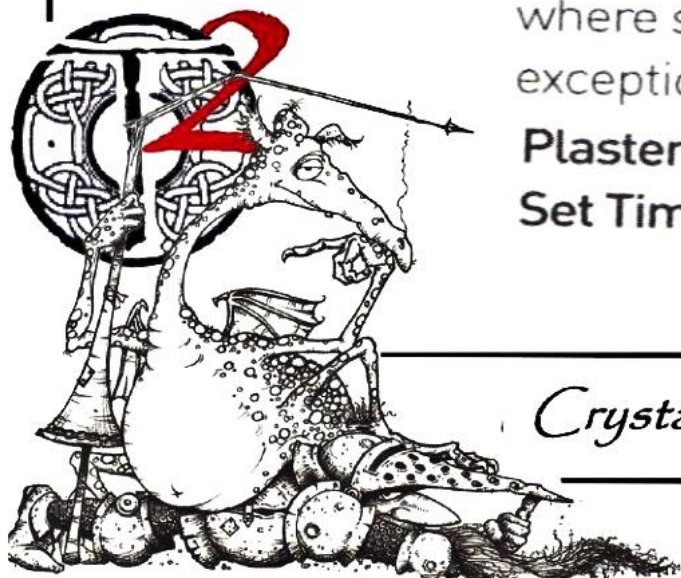

Crystacast Plaster

An exceptionally hard plaster for use in giftware and modelling application where surface hardness and exceptional detail are important.

Plaster/Water Ratio: 100/28

Set Time (Mins): 18

Crystacast

this is the only plaster that is 100% and not a mix

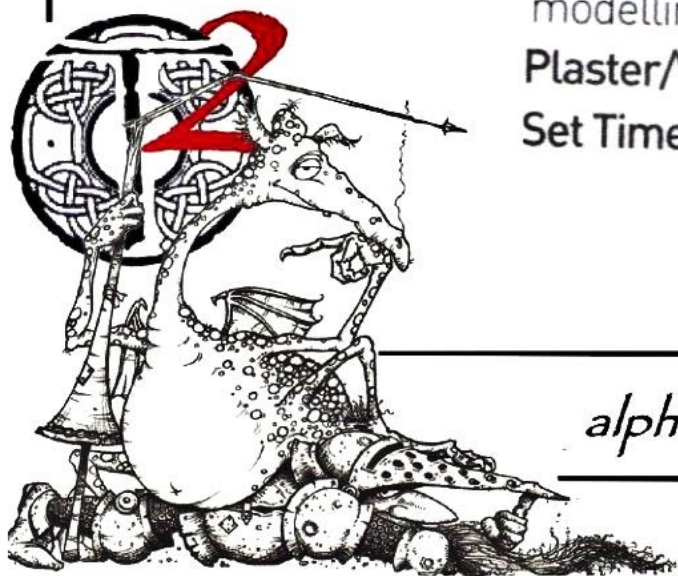

Crystacal Alpha K Plaster

An ultra high strength casting plaster developed to replace resin in the production of fine detailed giftware. Can also be used for industrial modelling.

Plaster/Water Ratio: 100/21

Set Time (Mins): 25

alpha K
