

Undergraduate assignment feedback form (to be completed by marker)

Student Name: Georgina Chamley	
Module title: HPPH6016	Student number:
For completion by marker:	
Comments: Q1. You present a thorough discussion of the C&C approach, evaluating objections in a plausible/well-considered manner. Your answer could be supplemented with a discussion of whether the normative stance we adopt has implications for climate change policy. 72 Q2. You provide an excellent answer to the question set, incorporating a wide range of important social issues. There is some need for a more developed discussion of 'weak' & 'strong' sustainability. This would allow you to analyse the concept of SD in more depth. But, overall, you evince an excellent grasp of the topic. 74	
Marker's signature: <i>Ref</i>	Date: 7/6/19
Provisional mark: 73	
NB. All marks are provisional until confirmed by the final examination board.
