Marked By	Nitheesh Murugan Kaliyamurthy

Engagement with Literature Skills	15
Feedback	Marks
Could have referred to more sources and materials in addressing threats, attacks and vulnerabilities. Excellent work. Key concepts (possible security breaches, threats, vulnerabilities, attacks, .meds) discussed. The report is well associated with the scenario given. Literatures referred to the work are not adequate. More academic credible literatures could have been referred to the work. How is a software defined networking literature support this work? Critical appraisals on the literatures could have added value	10.5

Knowledge and Understanding Skills	15
Feedback	Mark
The possible security breaches, threats, vulnerabilities and attacks were addressed well. .meds description was described in detail. Could have added more threats and attacks. Adding the type of cyber-attacks at the end in security policies seems odd and that could have been added here. I assume, it was due to the word limit. If that is the case, could have added more threats and attacks as annexure/ appendix. The strength of the statements used is very good. Could have added more evidences to the statements used.	14.4

Cognitive and Intellectual Skills	20
Feedback	Mark
Security guidelines provided were very good. However, could have added references/ benchmarked existing policies similar to the scenario. That could have added more value to the work. The organisations of ideas and evidences are good.	15.4

Practical Application Skills	40
Feedback	Mark
Packet Tracer done Other than Packet Tracer Course completion, no other practical tasks were done.	10

Transferable Skills for Life and Professional Practice	10
Feedback	Mark
Flow of ideas are good Could have added abbreviations/ definitions of technical terms used in the report.	6.4
Overall Mark	57
