Nicholas Araklitis - Intro

7

Essential skills are listening as well as speaking, problem solving as well as creativity, staying positive and aiming high, leadership and teamwork.

Essentials skills show people as they move school to work, from bottom of the work place to management and chasing and changing careers. They push people to use all their abilities to adapt change and be grounded for developing job skills, including digital skills.

An essential skill is a developed ability acquired through deliberate sustained efforts to smoothly and adaptively carry out complex situations, activities or job functions involving ideas, creation things, and/or people.

Employability *skills* are necessary qualities that individuals possess to grow their chances of finding work after finishing their studies. These skills different to academic qualifications and tech knowledge, they focus on personal qualities and abilities that make people more appealing to employers.

Time Management

Time management is the collaboration of tasks / activities that maximize and effect an individual's efforts, time management is to encourage people to get more work done in less time effectively.

Time management includes organization with planning and scheduling to best take advantage of the time available. whats important of time management is its ability to add meaning to time, for you or whoever is doing it getting the most out of their time. In a business way, its used to show goals and expectations for companies and their workers. Good time management skills support employees deliver good hard work and meet their goals very effectively. Time management also helps managers to understand what employees are capable of and to set realistic goals for them for now and the future.

Critical Thinking

Critical thinking is the smart way or disciplined process of actively and skillfully, applying, analyzing, synthesizing, and/or evaluating information gathered from, or generated by, observation, experience, reflection, reasoning, or communication, as a guide to belief and action.

20

Very important to ask yourself, What is Critical Thinking? and simply to fully understand its simply the ability to think clearly and rationally between creative ideas and thoughts, understanding the logical connection between ideas and being fully sussed of self.

Critical Writing

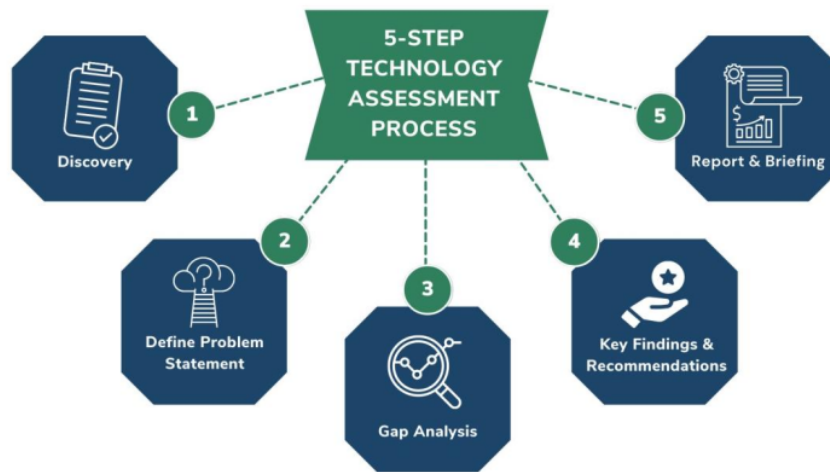

4

another way to think about the answer to What is critical writing? Critical writing involves analysing information to understand a problem or topic from more than one perspective; making logical connections between ideas; offering your own perspective on the topic based on your evaluation of the available evidence.

Tech For Assessment

TA is a way to study and evaluate new tech. It is a way of preparing for the upcoming tech studies that effect society, and then make decisions based on the judgments. Technology assessment recognizes the fact that scientists normally are not trained themselves and accordingly ought to be very careful when passing judgement on their own, or their colleagues, new findings, projects, or work in progress. TA is a very big phenomenon which also includes many aspects such as technology transfer and factors leading to rapid acceptance of new technology, and how it will effect society. Tech assessment is a global perspective and is future-oriented. TA considers its task approach to solving already existing problems and preventing damage caused by the commercialization of new technologies. TA is essential for this day and age, the world has gone in the direction with practically everything being digital now, crucial you get this round our heads because this is how we can avoid issues with mother earth and tech.

LIFE IS A TEAM SPORT...

Team work makes the dream work

Developing Critical Thinking Skills in Teams

Execute

Synthesize

Recommend

Generate

Critical thinking with a team requires you to listen openly to ideas, arguments, and criticisms

Communication, leadership and adaptability skills

Developing or having communication skills in any capacity has great and enormous benefits. When you work with people, you cannot avoid interactions. Being able to communicate clearly puts you in a position where it makes interaction more enjoyable. Nobody likes a person who cannot communicate clearly. When you work with people or as part of a team in any organization, having these relevant skills puts you in a position where you can convey your message and it can have a positive impact. Developing leadership skills sets you apart and puts you in a position wherever there are crisis and people can turn to you because they know you have the skills to be able to deal, lead and provide solutions to problems.

2 - using automatic referencing...

Automated referencing, or citation management, refers to the process of automatically generating citations and references for academic or research papers. It involves using software tools or platforms that can extract relevant information from sources such as books, articles, websites, and other reference materials, and then create properly formatted citations in accordance with specific citation styles.

Reference management software tools -

Zotero, Mendeley, or EndNote

14 Provide a comprehensive solution for managing references. They allow you to create and organize your reference library, import references from various sources, and automatically generate citations and bibliographies in different citation styles.

It's important to note that while automated referencing tools can be highly convenient, it's always advisable to double-check the generated citations for accuracy.
