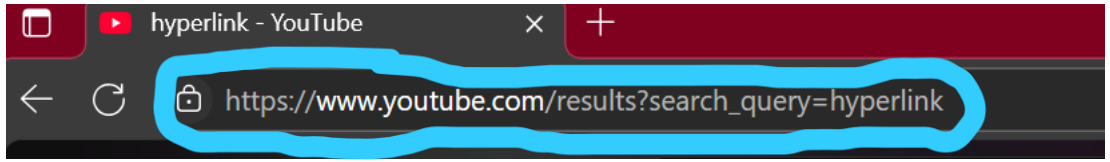
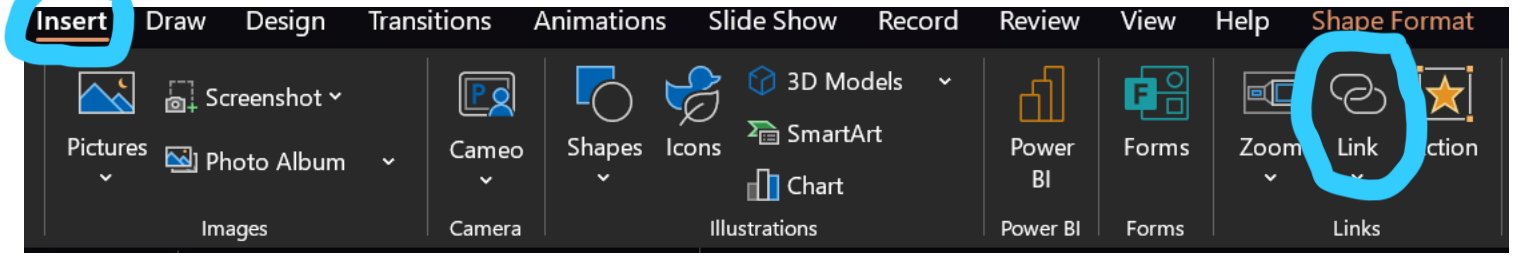
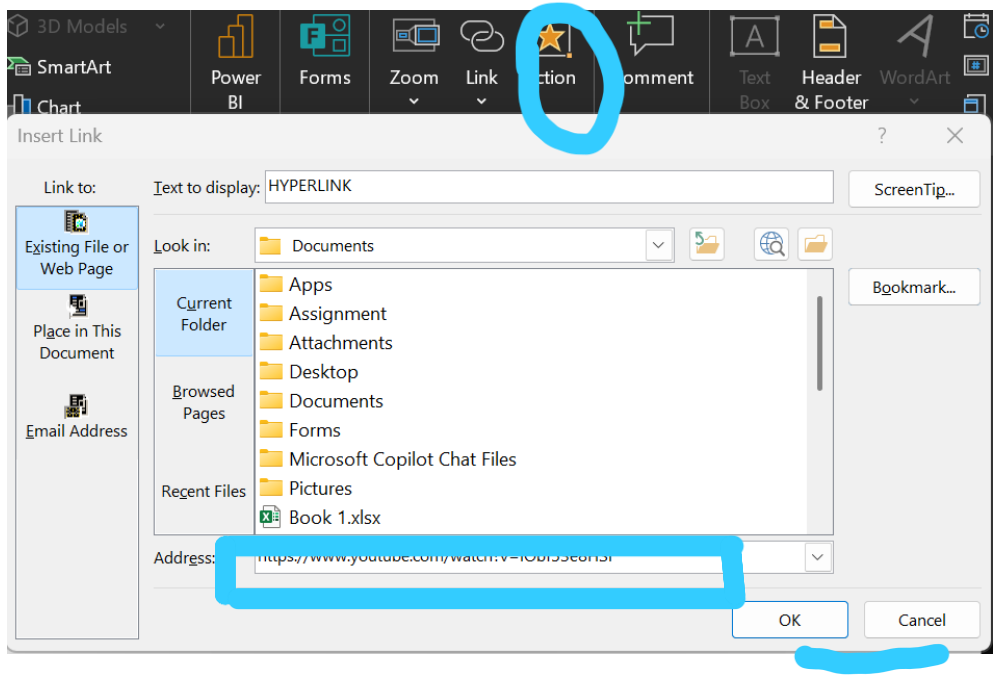
Let's create a hyperlink



Firstly, I went to select a video or any website that I wanted, then from the search bar I selected the link that I wanted to use and then copied it.



Then I went to PowerPoint and selected any word then clicked on INSERT and then I chose the option LINK



After that an option like this opened and I pasted the link that I copied before on the ADDRESS option, and I clicked on OK.

HYPERLINK

After clicking the OK button, the word that I selected before should turn out like this. And for opening the link I need to select CTRL from the keyboard + Right click from the mouse
