INTRODUCTION

Academic study skills are important skills that are essential for students to achieve their academic goal, these skills can boost their confidence and make them an independent learners in the pursuit of their academic goals. These skills are also seen as transferable skills which can be used outside the school life, they are skills that can be used at workplace in the future. Some of these skills are time management skills,reading,critical thinking, note taking, peer review,refection,refencing.However,only three will be discussed for the purpose of this poster.

NOTE TAKING

McPherson,(2018)states that one of the strategies in achieving academic success is note taking, it is presumed that note taking helps in remembering what has been read or learnt.

Note taking facilitates ability to select and review important key words and notes.

He further explains that note taking enables one to make use of an information that has

TIME MANAGEMENT

Morgan(2017)Time management is very crucial and important for student, there are various tasks to be achieved while studying which ranges from attending lectures, presentation, group work and writing exam and all this requires sufficient time limit and how student manage their time is crucial for academic success.

Time management helps

PLAGIARIAM

According to (Smale and Fowlie,2015)plagiarism is the act of copying other writers work without acknowledgement in the academic writing, this is seen as intellectual theft and as such is a serious offence in higher education.

Any copied work from any original source is referred to as plagiarism. All student must be able to read and understand their research resources and give evidence.

(Hopkins and Rein,2018)also states that copying quotation from original source and submitting it as your own work is an offence, the original idea has been stolen.
