

PEERS Project Survey

How satisfied were you with your final project?

The final result of the app was excellent. I gave specific detail into the requirements for the product & the end result focused & reflected on all our (sometimes over the top) demands and specifications

Were your requirements met?

Yes. The product did exactly what we requested & specified, plus more additional ideas were put into the app which was due to Sophie's additional knowledge of what the product could actually achieve for us.

How satisfied are you with the level of communication during your project's development?

I found Sophie to be very communicative during the whole process. We had several meetings, had some brain storming sessions, plus communication of development & information swapping was continuous throughout the whole process. Communication channels were clear and concise.

How likely are you to use Sophie Morgan again for potential future projects?

There is a strong likelihood that any project that we will look at in the future, Sophie will be my first port of call for.

How likely would you be to refer Sophie Morgan to friends or another business?

Very likely. Sophie has been professional and knowledgeable throughout the whole development. Making suggestions, developing sometimes impossible ideas, advising on possible changes to my ideas, completely positive throughout.

My experience of working with Sophie has been one of benefit. I find Sophie to be the utmost professional. Throughout the whole project Sophie has been positive, has an excellent grasp of dealing with people's requirements, by listening to their ideas, suggesting ways that those ideas may come to fruit and communicating all development plans, progress and challenges, but giving solutions to the challenges faced. Overall this experience has been an exciting and enjoyable one, working on an idea that Sophie has made possible to complete.
