Comments:

Try not to read verbatim off screen.

Objectives could be condensed? need an overarching aim

A bit too much time spent on describing the research sources, instead of explaining in detail what the sources contained, what you were going to do with the info specific examples etc.

More of a proposal at this point if we take the powerpoint at face value. - needs more clarification as to what exactly you are going to do, why, for who, what will the end product do etc etc.

Graph chart unrealistic for some aspects such as the software development.

Needed much more detail

why no examples of other benchmarking?

why no detail of what benchmarking is to be done? etc.
