

MARKING CRITERIA AND STUDENT FEEDBACK					
MODULE: Research Methods and Project					
ASSIGNMENT: Viva					
STUDENT: Michael Cunniffe					
DATE:					
This section details the assessment criteria. The extent to which these are demonstrated by you determines your mark. The marks available for each criterion are shown. Lecturers will use the space provided to comment on the achievement of the task(s), including those areas in which you have performed well and areas that would benefit from development/improvement.					
Common Assessment Criteria Applied			Marks available	Marks awarded	
1. Understanding and Analysis: Defence of work through technical questioning					
50-59%: Knowledge is accurate with a good understanding of the field of study.			90	49.5	
You did ok with your response to question 1, I think you could have used some of your graphical data to show what your cam profile is compared with your flow data. Some good points made with question 2 but I feel you needed to appreciate that tumble and swirl properties and vol eff is a trade off, and what you gain in one area you might lose in another. First sentence of your answer to question 3 makes little sense, but later on you give some citations that help your answer. Your answer to question 4 is fine, but I think your work is lacking really level 6 analytical content.					
2. Transferable Skills for Life and Professional Practice (Summary Poster)					
Attributes in professional practice: individual and collaborative working; deployment of appropriate media; presentation and organisation.			10	5	
50-59%: Can communicate effectively in a suitable format, but may have minor errors. Mostly coherent work and is in a suitable structure.					
You really needed to change the figure numbers, having figures 21 etc. makes for odd reading. I think you could have cut out a lot of the processes and focussed on the discussing the results and graphical data to really make this look professional and well considered.					
Assignment Mark (Assessment marks are subject to ratification at the Exam Board. These comments and marks are to give feedback on module work and are for guidance only until they are confirmed.)		Late Submission Penalties (tick if appropriate)		54.5	
		Up to one-week late			
		Over one week late
