RESEARCHING RESTORATION

- 1) CLICK ON THE FOLLOWING LINK: [STRATEGIC INTELLIGENCE \(WEFORUM.ORG\)](https://www.weforum.org/strategic-intelligence)
- 2) WHAT EXAMPLES CAN YOU FIND OF COASTAL AND MARINE HABITAT RESTORATION?

[Marine protected areas could save the ocean - here's how | World Economic Forum \(weforum.org\)](https://www.weforum.org)

For example, when does “**protection**” begin?

Does it begin when a government or other managing authority approves the creation of an MPA in law?

Or does it begin at the point at which measures are put in place with on-the-water management?

And what exactly does “**protection**” mean?

Some MPAs or MPA zones allow almost all types of extraction.

While other MPAs or MPA zones prohibit all types of extraction.

Different types of MPAs have different outcomes for people and nature. The MPA Guide clarifies what can be expected from different levels and stages of protection.

Stage of Establishment

Establishment of an MPA can take years. Biodiversity is not safeguarded until the MPA is implemented and enforced.

The MPA Guide recognizes four stages in this process.

PROPOSED/COMMITTED

DESIGNATED

IMPLEMENTED

ACTIVELY MANAGED

Level of Protection

The MPA Guide recognizes four levels of protection of biodiversity from extractive and destructive activities. These protection levels can be for the entire MPA or in a specific MPA zone. Effective design, compliance and enforcement are essential for each level.

MINIMALLY PROTECTED

LIGHTLY PROTECTED

HIGHLY PROTECTED

FULLY PROTECTED
