Task 3 – Work Summary

Screenshots

-
- The screenshot displays the Gibbs Reflective Model for the goal of learning Maya. The model consists of six steps:
- Description** – I created 5 assets. I became more familiar with the UI.
 - Feelings** – I felt that I wasn't pushing myself as hard as I wanted to.
 - Evaluation** – I had difficulty adjusting to the new key bindings, could have used my time better, and learned more effectively.
 - Analysis** – I should have made more specific SMART goals.
 - Conclusion** – I could have spread out the tasks more and tried more new tools. I did learn to use the software.
 - Action Plan** – I'm going to spread out my schedule and create a wider variety of assets.

Task 4 – Video Presentation
