Comments:

Try not to read from the screen - interact with your audience!

References? Put links to the references in the main text.

You need to tell us more about what you discovered in the lit review. How do the 4 technologies work? What was this "accident" that happened to the tech?

Try to create slides with bullet points that you can then talk about.

Needs some idea about how to analyze the data collected.

Some of the questions are good, but a viva isn't the place to start asking them.

Questions - some answered, notes would have helped for those you couldn't answer.
