Comments:

Aim & objectives presented + general introduction. Presentation style OK, some hesitation & ambiguity in minutes. Outline of Lit Review topics - logical to have methodology discussion next. Requirements analysis - Is 100% error free behaviour possible? Methodology - perhaps too much detail on background while more focus on practical application of choices for project would have been interesting. Development tech used? Very brief screening of evaluation & results. Conclusion & personal reflection better discuss than results. Questions answered well - mostly good level of detail, some needed follow up. Effective demo which showed the tech that was not discussed so much in presentation. Good enthusiasm!
