

Name: Darianny Santana Valdez.

Student ID: 2440015.

Module Code: (LCHS4001_LON).

Module: Academic and Employability Skills

Lecturer: Arif Ahmed.

Submitted on: 28/11/2025.

Reflective activity: Task 2

Section	Your response (Use your own words!)
1. Research	When I was researching my topic initially, I started using my knowledge, essentially what I know about that specific role, and applied all the methods I have learned so far, e.g., the CRAAP test, which stands for currency, Relevance, Authority, accuracy, and purpose, I also use specific key words such as, NHS careers, NHS Health care assistant this are reliable sources because it comes from the government. Most government pages, articles, and posts are reliable sources.
2. Presenting	While presenting, I was feeling nervous, but when I started talking about my topic, I saw everyone was paying attention, and they were aware of what I was presenting, so they could gain the knowledge. I prepared myself by doing my research and trying to understand my chosen job role.
3. Challenges you faced	The challenges I faced were with my pronunciation, research, because there is not much information about the job role I chose. Some of the articles I found were not reliable, so I had to do more research and next time I will do it better and acquire better language and communication skills.
4. Actions to improve	My actions to improve are to do more research so I can get better knowledge and practice more of my pronunciation and be better.
5. Further steps needed to prepare for Task 3	For task 3, I know we have been learning and gaining the tools since week 1, so we just need to be prepared, write well, use reliable research sources when needed, and understand the topic.

In conclusion, this task is not just to write about the topic, the specific role (health care assistant), but it is for you to write about your reflective experience, but basically all the things you have done so far in your assignments.
