

DISSERTATION

STARTS WITH A RESEARCH PROPOSAL

Forms the basis of chapter 1.

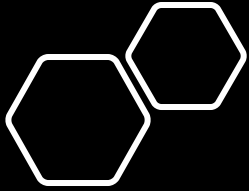

Allows you to examine your title/topic/research problem and think about the concern you are investigating.

Identification of key variables?

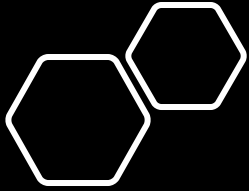

Identification of key authors who have advanced this area of inquiry.

WHAT IS THE PROBLEM?

- What actions should Facebook take to protect users' personal information and privacy?
- <https://www.online-stopwatch.com/full-screen-stopwatch/>
- IDENTIFY THEMES
- Responsibility, Trust
- Accountability, Governance
- Data protection, Privacy
- Prosumption - blurring of a line that separates the producer from consumer. FB exploits users by making profit with the help of their data.
- Socialist privacy ideals - protection of consumers', prosumers' and workers' privacy can only be achieved in an economy that is not ruled by profit interests.
- Struggle against corporate domination.

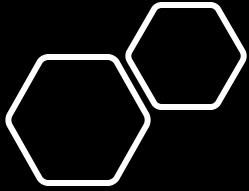

WHAT IS THE PROBLEM?

- What is the most significant environmental impact of the Green Man Festivals on the Brecon Beacons?
- <https://www.online-stopwatch.com/full-screen-stopwatch/>
- IDENTIFY THEMES

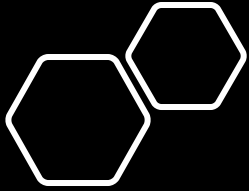

Sustainability and tourism and leisure industries. Augmentation of social capital, synergy between festivals and social capital - that is the processes between people which allow the establishment of a sense of co-operation, goodwill, reciprocity, belonging, and fellowship. Social capital is grounded in the connectivity of human activity and, as Putnam (1993, pp. 35-36) explains, it involves “features of social organisation, such as networks, norms, and trust that facilitate co-ordination and co-operation for mutual benefit.”

Costs and benefits of festivals.

WHAT IS THE PROBLEM?

- What clinical information systems can be integrated effectively to optimally manage diabetes care?
- <https://www.online-stopwatch.com/full-screen-stopwatch/>
- IDENTIFY THEMES
- Diabetes figures soaring at a cost of £25,000 per minute to NHS.
- Population care approaches for diabetes have the potential to improve the quality of care and decrease diabetes-related illnesses. Population care strategies are particularly relevant and can efficiently manage disease care at the health system level. What information systems can best manage this?
- <https://www.diabetes.co.uk/cost-of-diabetes.html>

Possible template

- There is a problem in ----- . Despite ----- (something that should be happening) ----- is occurring. (Provide supporting evidence.) This problem has negative impacts ----- --- (who or what has been affected) because ---- ----- . A possible cause of this problem is ----- . This dissertation evaluates, analyses ----- ----- by ----- (research method) in the hope of understanding more about this ----- (issue/problem).
