Personal Profile

I am a disciplined and reliable individual that takes personal ownership of my tasks and responsibilities making sure they are complete to a high standard and on time. In addition to this I'm deeply invested in the success of any team I am a part of. I proactively support my teammates wherever possible, ensuring collective progress and contributing to shared goals. By staying engaged and offering help where needed, I drive both individual and team success.

I have strong communication skills and can collaborate effectively within any team. I use active listening techniques and I'm not afraid of asking clarifying questions to make sure that I understand others, I also ensure that my message is understood. I have many years of experience working in diverse teams and working with the public, this has helped me develop the skills needed to adapt my communication style to different audiences and to quickly build effective working relationships.

I am passionate about building quality software. While I may not have commercial experience yet, I am always seeking to improve my skills by tinkering with personal projects, automating my own workflow challenges, and exploring new technologies. Even though these problems may be trivial, they provide valuable learning opportunities, helping me refine my coding practices and deepen my understanding of software development. I also engage in code katas to sharpen my problem-solving skills and to practice techniques around TDD and clean code.

Proficient Technologies

React.js
Visual Studio Code
Python
Kotlin
Android Studio
SQL

Education

BSc Software Engineering University of Wales Trinity Saint David
(UWTSD) - Final Year

Employment History

I have been in continuous employment since 2020, working as a team member in various customer service roles.

Jan 2020 to Jul 2021 - Krispy Kreme

Jul 2021 to Sep 2024 - Tesco Cafe

Sep 2024 to Present - Sainsbury's

I have always acted with the highest degree of professionalism, providing fantastic customer service and regularly earned praise from management for my work and contribution to the team. These roles helped me learn the skills and importance of teamwork, organization, taking ownership and consistently doing your best every day.

Before 2020 I was a stay at home mother raising three children.

Objectives

To collaborate with and learn from the best software engineers, engage with real world problems and contribute to the success of a project/product.
