Behind the scenes

Do you know what goes on behind the scenes to bring you the latest library resources?

- We check the price and licences when we order every book and journal to get value for money and provide access for as many students as possible. We then add keywords, so that you can find the right resources when you search the library catalogue

- . For online resources, we check that links work, to ensure you have seamless access. We even link the resource to your Online Resource List so that all your relevant reading is in one place
- . We regularly review our stock to provide access to the latest editions of popular texts and make our most-read print resources available online. We also work with suppliers to make sure our resources meet accessibility standards
- . All this saves you a lot of money. An average academic textbook costs around £45 ... multiply that by 15 (the number of books an undergraduate student can borrow at any one time) which amounts to £675 worth of books. If you borrowed just 15 books per term, that equals £2025 per year ... do that for the duration of a 3-year degree course and that's **£6075**. Then add in the journals and e-books which we provide free access to, the free WiFi, library spaces and expert advice. You can't afford NOT to use the library ...

Contact

If you have any queries, please contact **Alison Evans**.

Infoskills sessions can be booked via lecturers. In addition, smaller, more informal groups and 1-2-1 sessions can be booked by students
