

MARKING CRITERIA and STUDENT FEEDBACK

This section details the assessment criteria. The *extent* to which these are demonstrated by you determines your mark. The marks available for each criterion are shown. Lecturers will use the space provided to comment on the achievement of the task(s), including those areas in which you have performed well and areas that would benefit from development/improvement.

Common Assessment Criteria Applied	Marks Available	Marks Awarded
General Comments		
A bit of a mixed bag here - some of the practical implementation is fine, but there are way too many "simple" problems in order for this to be a good solution. Also, there is a question regarding the rubric and reading it "carefully" - as it is obvious that you have skim read it or was this a case of starting this assessment too late	100	37
1. Engagement with Literature Skills		
Rubric is clear on this as you should have provided a discussion on the importance of the concepts of rollback, commit, transactions and indexes	10	0
2. Knowledge and Understanding Skills		
Supplied ERD could be considered useful for this scenario - only problem here is the lack of justification (see rubric)	20	10
3. Cognitive and Intellectual Skills		
Although you have a working solution, there is a "slight" problem with the orders in that you can have only 1 item per order, what should be the case of having a "order detail" table, this will ensure that you can have multiple items. Also, there needs to be some form of data dictionary here is help you define each table (missing)	20	7
4. Practical Application Skills		
Although you have provided a set of scripts to implement this solution, you have not "fully" tested this solution and besides there is a syntax error with your transaction (see page 12) - Rubric is clear on this and the "other" requirements of this scenario	30	12
5. Transferable Skills for Life and Professional Practice		
Generally, presentation/structure of this report of a good standard - but your referencing/citing is in need of some work (this was discussed last year in the academic skills module) and you should be using IEEE. Also If you have read the rubric carefully - you are missing an evaluation of due process for this scenario	20	8

Assignment Mark (Assessment marks are subject to ratification at the Exam Board. These comments and marks are to give feedback on module work and are for guidance only until they are confirmed.)	Late Submission Penalties (tick if appropriate)		37
