Gain your MSc for less than you might expect

Did you know that your professional accounting qualifications could enable you to gain a full MSc qualification in as little as 9 months?

We offer two Postgraduate qualifications to accounting professionals, the **MSc in Financial Management** and an **MSc in Accounting and Finance**.

Our MSc courses are comprised of taught modules (part 1) and a dissertation (part 2). As a fully qualified accountant, you may be eligible to skip part 1 of the course and proceed directly to the dissertation stage, which can be studied in Swansea or at a distance. [Students who have partly completed professional qualifications may be granted exemptions from some of the taught modules in part 1.]

Our MSc courses provide an excellent opportunity for CPD for professionals working in the accounting or financial management sectors.

Throughout the courses you will address not only conventional accounting concepts but also the need for broader-based management perspectives that facilitate the continued role of the accountant in all areas of business management. There is a strong emphasis in the programme on the development of personal managerial skills and the application of the critical and analytical skills needed by contemporary financial managers and accountants.

To find out more about these courses and our recognition of prior learning scheme, contact the programme director Richard Dunstan.

“

As a qualified accountant I was looking to do a masters in financial management. UWTSD gave me full exemption from part 1 which meant that I only had to complete a dissertation, which made a big difference in furthering my qualifications without doing double work
